COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Describe typical physical and motor development for school age children.
2. Describe typical cognitive characteristics of children at different ages between the ages of 5 and 14.
3. Describe typical social and emotional characteristics of children at different ages between the ages of 5 and 14.
4. Evaluate the theories of Erickson, Kohlberg, Maslow, Gilligan and Piaget (moral reasoning) in school age children's social, emotional and moral development.
5. Design guidance and discipline procedures for school age children based on the children's stage of moral development.
6. Apply Piaget's cognitive theory and Howard Gardner's multiple intelligences theory to support the cognitive development of school age children.
7. Employ techniques that develop positive and productive human relationships with children, with staff members, and with families as outlined in the National School-Age Care Alliance Standards for Quality School Age Care.
8. Develop plans and procedures that support each individual child's culture and home language.
9. Critique one's own interactions and practices with school age children, families, and fellow staff members.
10. Observe children in order to develop appropriate developmental plans for the individual child and the group.

Topics and Scope:

1. Physical and motor development.

2. Health of school-age children.
3. Cognitive and memory development.
4. Language and literacy.
5. Social and moral development.
6. Emotional and sexual development.
7. Children with special needs.
8. Current issues and concerns of this age group.
9. The influence of family, peers and culture on the school age child.
10. The role of adults in supporting optimal growth and development.
11. Developmentally appropriate practice in programs that serve the school age child.

Assignment:

1. Read the assigned texts, approximately one chapter per week, and 4-5 handouts per week, in preparation for class sessions and written exams.
2. Keep a journal reflecting on concepts and practices presented in the course. Each journal entry should be a minimum of one page in length.
3. Complete reaction essays on films, speakers and other class presentations. Reaction essays should be a minimum of a half page in length.
4. Observe school age children and complete observations focused on their growth and development. Observations should be a minimum of one page in length.
5. Observe school age children of different age groups and write a summary to include physical development, cognitive development, and social-emotional development of the child. Summaries should be a minimum of one page in length.
6. Begin a portfolio. Examples of things to include in the portfolio are: observations and any pertinent articles, websites, community resources and activities which have increased your knowledge and understanding of school age children. Include a short statement on how each of these materials relates to the development of the school age child.
7. Observe at different school age childcare sites and summarize their use of culturally sensitive practices.
8. Engage with fellow students in problem solving around issues concerning school age children.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written journals, homework, reading reports, and observations.

Writing
40 - 45%
