## Certificate/Major Applicable:

Both Certificate and Major Applicable

## **COURSE CONTENT**

## **Outcomes and Objectives:**

Upon successful completion of this course the student will be able to:

- 1. Summarize the theory, practice and application of wood frame construction.
- 2. Demonstrate comprehension by:
  - a. Generating a floor plan drawing.
  - b. Generating a foundation and floor framing plan drawing.
  - c. Generating a roof framing plan drawing.
  - d. Generating a cross and/or longitudinal section drawing.
- 3. Identify common code requirements for each drawing type.

## **Topics and Scope:**

- 1. Elements of a floor plan
  - a. Plan view of walls
  - b. Openings in walls
    - 1. doors, windows, etc.
    - 2. built-in items
  - c. Introduction to related code requirements and drawing conventions
- 2. Elements of a foundation and floor framing plan
  - a. Plan view of wood framed floor components
  - b. Concrete slab components, from the bottom of the footing to the top of the floor
  - c. Introduction to related code requirements and drawing conventions
- 3. Elements of a roof framing plan
  - a. Plan view of wood frames roof components, from the support below ceiling/roof to the top of the ridge

- b. Introduction to related code requirements and drawing conventions
- 4. Elements of section drawings
  - a. Section view of foundation, floor, and roof elements at one and/or two locations on building
  - b. Views perpendicular to each other
  - c. Introduction to related code requirements and drawing conventions

#### **Assignment:**

- 1. The same simple wood frame structure will be used for all manual drawing assignments:
  - a. Draw a floor plan from provided reference material.
  - b. Draw a foundation and floor framing plan from provided reference materials
  - c. Draw a roof framing plan from provided reference materials.
  - d. Draw a cross and/or longitudinal section from provided reference materials.
  - e. Draw selected details from provided reference materials.
- 2. 4 quizzes and 1 final exam (objective examinations).
- 3. Reading assignments 15 30 pages per week.

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Drafting assignments

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Drafting assignments

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes, objective examinations (multiple choice, true/false, matching items, completion and problem solving)

Writing 0 - 0%

Problem solving 15 - 30%

Skill Demonstrations 50 - 65%

Exams 15 - 30%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Class participation	Other Cates 5 - 10%
