CS 63.11 Course Outline as of Fall 2017

CATALOG INFORMATION

Dept and Nbr: CS 63.11 Title: MS ACCESS

Full Title: Microsoft Access Last Reviewed: 4/13/2015

Units		Course Hours per Week	•	Nbr of Weeks	Course Hours Total	
Maximum	3.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	3.00	Lab Scheduled	0	4	Lab Scheduled	0
		Contact DHR	0		Contact DHR	0
		Contact Total	3.00		Contact Total	52.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CIS 69.31

Catalog Description:

An introduction to Microsoft Access emphasizing its use as a general purpose relational database management system. Topics include how to design, create, update, modify, select, and report from a database using the Access objects: tables, queries, forms, and reports.

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Schedule of Classes Information:

Description: An introduction to Microsoft Access emphasizing its use as a general purpose relational database management system. Topics include how to design, create, update, modify, select, and report from a database using the Access objects: tables, queries, forms, and reports. (Grade or P/NP)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Transfer Credit:

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

- 1. Design and create tables.
- 2. Filter, sort, and search for data from tables and forms.
- 3. Given a written set of criteria, select the appropriate query type, create a query, and successfully manipulate table data.
- 4. Produce a custom form with detail, header, and footer sections.
- 5. Produce a custom report with a detail section as well as page and group headers and footers.
- 6. Create expressions to produce calculated fields.
- 7. Compare and contrast flat file and relational databases.
- 8. Distinguish between the inner and the two outer joins, examine the data requirements and apply the appropriate join.
- 9. Analyze a written description of a desired data subset and create a query, applying appropriate comparison and logical operators.
- 10. Distinguish between one to one, one to many, and many to many relationships in database design and implement the relationships between the database tables.

Topics and Scope:

- 1. Introduction to database concepts
 - a. Flat file database vs. relational database
 - b. Defining relationships
 - 1) One to many
 - 2) One to one
 - 3) Many to many
 - 4) The relationship window
 - c. Organizing data
 - 1) Records
 - 2) Fields

- 3) Key fields
- 4) Tables
- 2. Access objects
 - a. Tables
 - b. Queries
 - c. Forms
 - d. Reports
- 3. Defining the structure of a table
 - a. Field name and its characteristics
 - b. Data types
 - c. Field properties
 - d. Specifying a key field
- 4. Maintaining a database table
 - a. Deleting a field
 - b. Moving a field
 - c. Adding a field
 - d. Changing field properties
 - e. Copying records from another database
 - f. Deleting records
 - g. Changing records
- 5. Queries
 - a. Simple queries with comparison operators
 - b. Using logical operators
 - 1) The OR operator
 - 2) The AND operator
 - c. Special operators
 - 1) IN operator
 - 2) LIKE operator
 - d. Relating tables in the query window
- 6. More advanced queries
 - a. Using both AND and OR in the same query
 - b. Calculated fields
 - c. Aggregate functions
 - d. Group by
 - e. Action queries
 - 1) Update
 - 2) Append
 - 3) Delete
 - 4) Make table
 - f. Top and bottom value queries
 - g. Cross tab queries
- 7. Forms
 - a. Automatic forms created by Access
 - b. Using the form wizard
 - c. Creating forms with the design window
 - 1) Adding controls
 - 2) Moving, sizing and deleting controls
 - 3) Formatting controls
 - d. The different form sections and their functions
 - e. Main forms with subforms
 - f. Filtering forms
 - 1) Filter by form

- 2) Filter by selection
- 3) Saving a filter as a query
- 4) Applying a filter saved as a query
- 8. Reports
 - a. Automatic reports created by Access
 - b. Using the report wizard
 - c. Creating reports with the design window
 - 1) Adding controls
 - 2) Moving, sizing and deleting controls
 - 3) Formatting controls
 - d. The different report sections and their functions
 - e. Main reports with subreports
 - f. Adding controls from Access
 - 1) Date
 - 2) Page number
 - g. Sorting and grouping in a report
- 9. Overview of macros

Assignment:

- 1. Hands-on quizzes
- 2. Performance exams on computer
- 3. Read 20-30 pages per week
- 4. Answer end-of-chapter questions
- 5. Computer tutorial labs
- 6. Case studies done on the computer
- 7. Project incorporating database design creating tables with appropriate relationships including effective queries, reports, and forms
- 8. Two or three tests

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or noncomputational problem solving skills.

Homework problems (end-of-chapter questions), case studies, project

Problem solving 70 - 75%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Skill Demonstrations Performance exams, tutorial labs 15 - 25% **Exams:** All forms of formal testing, other than skill performance exams. Exams Tests: multiple choice, true false, matching, or completion 5 - 10% **Other:** Includes any assessment tools that do not logically fit into the above categories. Other Category 0 - 0%

Representative Textbooks and Materials:

None

New Perspectives: Microsoft Access 2013 Comprehensive, by Adamski and Finnegan. Course Technology, 2013.
