#### NRM 73 Course Outline as of Fall 2020

### **CATALOG INFORMATION**

Dept and Nbr: NRM 73 Title: INTRO FOREST MEASUREMENT

Full Title: Introduction to Forest Measurements

Last Reviewed: 3/23/2015

Units		Course Hours per Week		Nbr of Weeks	<b>Course Hours Total</b>	
Maximum	3.00	Lecture Scheduled	2.00	17.5	Lecture Scheduled	35.00
Minimum	3.00	Lab Scheduled	3.00	6	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: FOR 73

#### **Catalog Description:**

Introduction to timber inventory systems, cruise designs, aerial photographic interpretation, and log scaling. Measurement of timber stand growth, quantity and quality, and other forest products including water, range, wildlife and outdoor recreation. Field trips are mandatory.

### **Prerequisites/Corequisites:**

# **Recommended Preparation:**

Eligibility for ENGL 100 or ESL 100; AND Eligibility for MATH 150A

#### **Limits on Enrollment:**

#### **Schedule of Classes Information:**

Description: Introduction to timber inventory systems, cruise designs, aerial photographic interpretation, and log scaling. Measurement of timber stand growth, quantity and quality, and other forest products including water, range, wildlife, outdoor recreation, carbon storage and fuel loading. Field trips are mandatory. (Grade Only)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100; AND Eligibility for MATH 150A

Limits on Enrollment:

**Transfer Credit:** 

Repeatability: Two Repeats if Grade was D, F, NC, or NP

#### **Certificate/Major Applicable:**

Both Certificate and Major Applicable

# **COURSE CONTENT**

#### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

- 1. Apply and use timber inventory systems, cruise designs, aerial photographic interpretation, and log scaling.
- 2. Measure and determine timber stand growth, quantity, and quality.
- 3. Evaluate other forest attributes on the site including water, range, recreational use, wildlife, carbon storage and fuel loading.

#### **Objectives:**

Upon successful completion of this course, students will be able to:

- 1. Discuss the objectives and goals of a forest inventory project.
- 2. Apply fundamental measurement and statistical methods to the mensuration of a variety of ecosystem components.
- 3. Measure and record data from a forest setting using state-of-the-art technologies utilized in the forest industry as well as simple measurement devices.
- 4. Select and apply appropriate problem solving techniques to specific measurement situations.
- 5. Collect and analyze data on the growth and yield of forest products over time.
- 6. Select appropriate software and measurement tools to perform forest inventory, cruising, and scaling in an efficient manner and according to industry standards.
- 7. Download GPS (Global Positioning System) data from recorder to PC to generate map and data tables.
- 8. Manipulate stand data using modeling software.
- 9. Apply various field-sampling methods.
- 10. Cruise standing timber and determine the quantity and quality of wood.
- 11. Scale logs for the board foot volume based on mathematical formulations.
- 12. Delineate timber types, cultural features and areas using stereoscopic aerial photography.
- 13. Identify commercial species of logs by bark and wood characteristics.
- 14. Assess the damage to wood volumes from insect, fire, suppressed conditions, and human factors, and estimate the financial loss.

### **Topics and Scope:**

- I. Forest Inventory
- A. Goals and objectives
- B. Scope of forest measurements
- C. Theory of forest measurements
- D. Units of measure
- E. U.S. customary vs. metric
- F. Volumes
- G. Area determination
- II. Forest Measurements
- A. Scope of forest measurements
- B. Theory of forest measurements
- C. Units of measure
- D. U.S. customary vs. metric
- E. Volumes
- F. Area determination
- III. Measurement Analysis Tools and Technologies

#### A. Tools

- 1. Field data collectors
- 2. Hypsometers
- 3. Loggers tapes
- 4. Prisms
- 5. Clinometers
- 6. Relaskops
- 7. Hand held distance lasers
- 8. Cruisers sticks
- 9. Scaling sticks
- 10. Hand compass
- 11. Planimeters
- B. Technologies
  - 1. Programmable hand held data collectors
  - 2. Hand held GPS units
  - 3. Laser range finders
  - 4. Stereoscopes
  - 5. Basic forest modeling software
  - 6. Increment borers
  - 7. Compensating polar planimeters

# IV. Timber Cruising

- A. Identification of species
- B. Measurement of Trees
  - 1. Inventory equipment
  - 2. Utilization standards
  - 3. Height and diameter measurements
  - 4. Gross Volume Determination

# C. Grading of logs

- 1. Recognition of defect types
- 2. Cull Allowance for Defects
- 3. Log Grade Estimation
- 4. Net Tree Volume Determination
- D. Types of Cruises

- 1. Strip Cruising
- 2. Plot Cruising
- 3. Variable Plot Cruising

#### E. Volume tables

- 1. Local Volume Tables
- 2. Standard Volume Tables
- 3. Form Class Volume Tables
- 4. Volume Table Construction
- F. Growth studies

# V. Log Scaling

- A. Log scaling defined
- B. Gross and net volumes
- C. Defects
  - 1. Recognition of Defect Types
  - 2. Cull Allowance for Defects
  - 3. Log Grade Estimation
  - 4. Net Log Volume Determination
- D. Log scale tables and tools
  - 1. Board Foot Log Rules
  - 2. Cubic Foot Log Rules
  - 3. Diagram Rules
  - 4. Formula Rules
- E. Identification of species of logs and finished lumber
- VI. Timber Type Mapping
- A. Aerial photo interpretation
- B. Species identification
- C. Delineation methods
- VII. Other Forest Measurements
- A. Wood products
- B. By-products
- C. Water
- D. Range
- E. Wildlife
- F. Recreation
- G. Soils
- H. Fisheries
- I. Carbon storage
- J. Fuel loading
- VIII. Inventory Analysis and Techniques
- A. Data collection
- B. Data analysis

# **Assignment:**

### Assignments may include:

- 1. Reading assignments that will average 10 15 pages per week.
- 2. Four timber inventory reports totaling twenty pages.
- 3. Timber inventory field notebook totaling twenty-five pages of field measurements, including measurements of tree heights, diameters, basal area, slope, aspect, stocking levels, species composition, log volumes and defects, growth rates fuel loading, and stand types, using measurement and analysis tools.
- 4. Five practice sets totaling fifteen pages of computations.

- 5. Laboratory exercises: field trips emphasizing the collection, examination, and evaluation of field data.
- 6. Locate points on the ground from a map or photo and stratify timber stands and identify species differences on aerial photography.
- 7. Prepare simple and accurate maps from field data.
- 8. Quizzes; final exam.

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Timber inventory reports

Writing 20 - 30%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, field work, field notebook; lab exercises

Problem solving 40 - 50%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes and final exam: completion, short essay questions

Exams 30 - 40%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category 0 - 10%

### **Representative Textbooks and Materials:**
