COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze and evaluate the central theoretical approaches to the study of international relations.
2. Describe the historical development of the international system.
3. Identify the key institutions and actors (state and non-state) in world politics, and evaluate how their interactions shape policy on issues such as international security, international trade, and the environment.

Objectives:

At the conclusion of this course, the student should be able to:

1. Define key terms, events, and concepts used in international relations.
2. Identify the main actors studied by international relations scholars.
3. Question their own values with respect to other countries and their foreign policy objectives.
4. Identify and evaluate the explanatory, descriptive, and predictive power of different international relations theories.

5. Understand the universal and enduring nature of conflict in the international system.
6. Describe the historical evolution of the international system.
7. Formulate ideas about how to address current world order problems such as nuclear proliferation, international warfare, global economic inequality, and climate change.

Topics and Scope:

- I. Introduction to the Study of International Relations
 - A. Historical development of the nation-state system
