		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable
Grading: Grade Only
Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP
Also Listed As:
Formerly:

Catalog Description:
In this course, students will learn about introduction to electronic components and underlying physics concepts, electrical units, direct current (DC), DC circuit analysis, batteries, magnetism, meters, alternating current (AC), capacitance, inductance, transformers, and AC circuit analysis.

Prerequisites/Corequisites:

Recommended Preparation:
Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Both Certificate and Major Applicable

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Identify and describe the characteristics of common electronic components.
2. Analyze and measure the characteristics of typical DC and AC circuits.
3. Use algebra and right angle trigonometry to solve electronic circuit calculations.

Objectives:

At the conclusion of this course, the student should be able to:

1. Use algebraic functions, signed numbers and metric notations to make circuit calculations using Ohm's law, Watt's law, and Kirchhoff's laws.
2. Use algebraic expressions and numerical representations to analyze and evaluate series, parallel, and series-parallel circuits.
3. Summarize the basic characteristics of magnetism.
4. Identify alternating current (AC) units.
5. Use signed numbers to calculate values in an AC resistive circuit.
6. Identify and describe the characteristics of capacitors, inductors, and transformers using trigonometric functions.
7. Analyze and evaluate resistor-capacitor (RC), resistor-inductor (RL), and resistor-inductor-capacitor (RLC) circuits through the application of right angle trigonometry.

Topics and Scope:

- I. Atoms
 - A. Bohr model structure
 - B. Quantum mechanical model structure
- II. Review of Elementary Algebra
- III. Basic Laws of Physics
 - A. Ohm's law
 - B. Watt's law

- C. Kirchoff's laws
- IV. Direct Current (DC) Circuits
 - A. Digital volt meters
 - B. Series circuits
 - C. Parallel circuits
 - D. Series-parallel circuits
- V. Unloaded Voltage Dividers
- VI. Conductors and Insulators
- VII. Control Components
 - A. Switches
 - B. Fuses
 - C. Circuit breakers
- VIII. Fixed and Variable Resistors
- IX. Batteries
- X. Magnetism
- XI. Right Angle Trigonometry
- XII. Alternating Current (AC)
 - A. Oscilloscope operation
 - B. Frequency
 - C. Sine wave values
- XIII. Capacitors and Capacitance
 - A. Resistor-capacitor (RC) time constant
 - B. Capacitive reactance
 - C. RC circuit impedance
 - 1. series
 - 2. parallel
 - 3. series-parallel
- XIV. Inductors and Inductance
 - A. Resistor-inductor (RL) time constant
 - B. Inductive reactance
 - C. RL circuit impedance
 - 1. series
 - 2. parallel
 - 3. series-parallel
- XV. Resistor, Inductor, Capacitor (RLC) Circuits
 - A. Series
 - B. Parallel
 - C. Admittance, conductance and susceptance
 - D. Transformers

All subjects are covered in both lecture and lab portions of the course.

LABORATORY MATERIAL

- I. Ohm's law simple circuits
- II. Series Circuits - Kirchoff's laws, Watt's law, and Ohm's law. Voltage dividers
- III. Parallel Circuits - Kirchoff's laws, Watt's law, and Ohm's law. Current dividers
- IV. Complex Circuits - Kirchoff's laws, Watt's law, and Ohm's law. Maximum power transfer
- V. Basic oscilloscope and multimeter operation and measurements
- VI. Resistor - Capacitor (RC) circuits, impedance measurements, and calculations including RC time constant
- VII. Resistor - Inductor (RL) circuits, impedance measurements, and calculations
- VIII. RLC circuits - impedance measurements and calculations

Assignment:

Lecture-Related Assignments:

1. Textbook readings (20-30 pages per week)
2. Homework assignments (8-14)
3. Quizzes (2-6)
4. Final exam

Lab-Related Assignments:

1. Lab reports (8-14)
2. Lab skills test

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports

Writing
20 - 40%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework assignments

Problem solving
10 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Lab skills test

Skill Demonstrations
10 - 20%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes; final exam

Exams
30 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
