		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 35.00 Total Student Learning Hours: 78.75

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: APTECH 55

### **Catalog Description:**

In this course, students will learn drawing-based manual drafting with a cursory introduction to Computer-Aided Drafting (CAD) for comparison. Topics include proper use of drafting tools, development of linework and lettering skills, procedures for geometric constructions, freehand drafting/sketching, orthographic projection, and isometric drawing.

# **Prerequisites/Corequisites:**

### **Recommended Preparation:**

#### **Limits on Enrollment:**

### **Schedule of Classes Information:**

Description: In this course, students will learn drawing-based manual drafting with a cursory introduction to Computer-Aided Drafting (CAD) for comparison. Topics include proper use of drafting tools, development of linework and lettering skills, procedures for geometric constructions, freehand drafting/sketching, orthographic projection, and isometric drawing. (Grade Only)

Prerequisites/Corequisites:

Recommended:

Limits on Enrollment: Transfer Credit: CSU;UC.

Repeatability: Two Repeats if Grade was D, F, NC, or NP

# Certificate/Major Applicable:

Both Certificate and Major Applicable

# **COURSE CONTENT**

## **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

- 1. Describe the role of drawing and drafting in contemporary industries
- 2. Utilize manual drafting equipment to produce technical drawings
- 3. Compare manual drafting to Computer-Aided Drafting (CAD) methods

# **Objectives:**

At the conclusion of this course, the student should be able to:

- 1. Describe drafting career and employment opportunities in contemporary industries
- 2. Select appropriate drafting equipment and supplies
- 3. Utilize drafting tools effectively in the production of drafting projects
- 4. Produce consistent linework on drafting projects
- 5. Produce legible lettering in drafting projects
- 6. Execute geometric constructions
- 7. Execute sketching and freehand drafting
- 8. Develop orthographic projections and isometric drawings
- 9. Utilize dimensioning conventions
- 10. Prepare hand-drafted working drawings
- 11. Compare manual-drafting to CAD-drafting processes

# **Topics and Scope:**

- I. Introduction to Contemporary Drafting
  - A. History of the profession
  - B. Drafting occupations and industries
  - C. Language of drawing
  - D. Design process

- E. Contemporary drafting
- F. Types of basic engineering graphics
- II. Drafting Equipment and Supplies
  - A. Conventional drafting supplies
  - B. Conventional drafting equipment
  - C. Production of copies and prints
- III. Drafting Conventions and Formats
  - A. Linework
    - 1. Conventions
    - 2. Use of tools
    - 3. Drawing procedure
    - 4. Construction linework
    - 5. Reproducible linework
  - B. Lettering
    - 1. Conventions
    - 2. Lettering shapes
    - 3. Lettering practice
  - C. Drafting conventions
  - D. Drawing formats
- IV. Geometric Construction
  - A. Use of compass and other tools for geometric constructions
  - B. Basic geometric drafting techniques
    - 1. Dividing lines
    - 2. Constructing regular polygons
  - C. Complex geometric constructions
    - 1. Tangencies of lines, arcs, and circles
    - 2. Fillets
- V. Freehand drawing
  - A. Sketching for technical drawings
  - B. Freehand drafting techniques
- VI. Introduction to Multiview Orthographic Projection
  - A. Principles
    - 1. Selection of views
    - 2. Freehand three-view drawings
    - 3. Planes of projection
    - 4. Angles of projection
    - 5. Visualization
  - B. Drawing procedures
  - C. Orthographic projections from incomplete data
  - D. Isometric drawing
    - 1. Introduction to isometrics
    - 2. Drawing isometrics using instruments
- VII. Dimensions and Tolerances
  - A. Systems of dimensioning
  - B. Dimensioning elements
  - C. Dimensioning guidelines
  - D. Tolerancing basics
  - E. Surface finish notation
- VIII. Overview of CAD applications Comparison of Manual Drafting to CAD

All topics are covered in the lecture and lab portions of the course.

### **Assignment:**

Lecture-Related Assignments:

- 1. Weekly reading assignments (1-5 pages)
- 2. Quiz(zes) (1-3)
- 3. Final exam

Lab-Related Assignments:

- 1. Linework and lettering exercises (2-5)
- 2. Manually drafted technical drawings (6-8)

Lecture- and Lab-Related Assignments:

- 1. Freehand drawing exercises (4-8)
- 2. Geometric construction exercises (5-10)
- 3. Orthographic and isometric projection sketches (5-10)
- 4. Basic CAD drawing(s) (1-2)

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Exercises; drawings; sketches

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Quiz(zes)

**Exams:** All forms of formal testing, other than skill performance exams.

Quiz(zes); final exam

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Participation

Writing 0 - 0%

Problem solving 60 - 70%

Skill Demonstrations 5 - 10%

Exams 15 - 25%

Other Category 0 - 10%
