Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: AG 52

Catalog Description:
Exploration of major agricultural pests, including insects, weeds, and diseases, and their impact on commercial crops and the landscape. The course focuses on integrated pest management (IPM), including cultural, biological, mechanical/physical, and chemical control methods. Course is designed to assist students in preparing for California licensing exams in pest management.

Prerequisites/Corequisites:

Recommended Preparation:
Eligibility for ENGL 100 OR EMLS 100 (formerly ESL 100) or appropriate placement based on AB705 mandates

Limits on Enrollment:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Outline the knowledge expectations mandated by California Department of Pesticide Regulation in order to pass pest management licensing exams.
2. Identify regionally significant plant and insect pest organisms.
3. Design an integrated pest management plan.

Objectives:

At the conclusion of this course, the student should be able to:

1. Identify ecological principles as they relate to the principles and concepts of integrated pest management.
2. Classify pests into the major taxonomic groups significant to crops and landscape.
3. Identify the major types of agricultural and landscape pests.
4. Detect and analyze pest infestation damage caused by insects, weeds, diseases, and other common pests.
5. Observe and identify significant anatomical features of pests using microscopes, hand lenses, or other diagnostic equipment.
6. Monitor pests in agricultural and landscape settings and produce a log of pest activity and population levels.
7. Describe the basic methods of biological, cultural, mechanical/physical, and chemical pest control.
8. Develop an integrated pest management strategy for a specific crop or landscape site.
9. Compare the classifications and formulations of pesticides and their use in a pest control environment.

10. Outline the basic laws and regulations governing the use of pesticides.
11. Describe how to prepare pesticides/spray equipment safely and accurately, and (using mock products) demonstrate the correct application of these materials.
12. List methods for responding to accidents and environmental hazards involving pest control materials.

Topics and Scope:

- I. Introduction to Pest Management and the IPM Concept
- II. Ecological Principles Related to IPM Concept
- III. Pest ID/Classification
 - A. Arthropods
 - B. Mollusks
 - C. Nematodes
 - D. Vertebrates
 - E. Weeds
 - F. Pathogens (disease causing agents)
 1. bacteria
 2. fungi
 3. viruses
 - G. Abiotic disorders
- IV. Monitoring Procedures
- V. Management Methods of IPM Programs
 - A. Biological
 - B. Cultural
 - C. Mechanical/Physical
 - D. Chemical
- VI. Pesticide Use
 - A. Laws and regulations
 - B. Pesticide label and signal words
 - C. Personal protective equipment and safety procedures
 - D. Calibration of equipment
- VII. Health and Environmental Concerns
 - A. Pesticide emergencies
 - B. Minimizing environmental risks

Concepts presented in lecture are applied and practiced in lab.

Assignment:

Lecture Assignments:

1. Weekly reading (20-30 pages)
2. Three trade article reviews (1-2 pages)
3. One written report (3- 5 pages) on integrated pest management (IPM) plan for a particular crop or pest/disease
4. One formal presentation on integrated pest management (IPM) plan for a particular crop or pest/disease (15 minutes)
5. Quizzes, mid-terms, and final exam

Lab Related Assignments:

1. Weekly lab reports
2. Insect ID collection

3. Weed ID collection

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Reports, trade article reviews

Writing
10 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Integrated pest management (IPM) plan for a particular crop or pest/disease

Problem solving
10 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Insect ID collection, weed ID collection

Skill Demonstrations
10 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, mid-terms, final exam

Exams
30 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

IPM plan presentation

Other Category
10 - 30%
