COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Describe and discuss the use of homeopathy, acupuncture, chiropractic, herbal medicine, and nutrional supplementation for veterinary patients.
- 2. Describe and discuss routine preventative care including vaccinations, nutritional support, and age-related medical needs from a complementary and alternative perspective.
- 3. Describe and discuss the preparation and administration of homeopathic remedies, herbal medicines, and nutritional supplements.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Discuss proper preventative medicine protocols including vaccination.
- 2. Compare homeopathic approach to conventional treatment.
- 3. Describe the symptom based method of homeopathic remedy selection.
- 4. Identify key symptomology and describe patient evaluation under homepathic care.
- 5. Describe proper administration of homeopathic remedies.
- 6. Describe common dosing interval and potency of homeopathic remedies.
- 7. Describe the theories commonly used for treatment in Tradtional Chinese Medicine.
- 8. Describe the location and action of major acupuncture points used in animals.
- 9. Describe the proper technique for acupressure.
- 10. Describe the proper technique for acupuncutre needle removal.
- 11. Describe common treatment frequency and patient monitoring with acupuncture.

- 12. Discuss range of motion palpation and chiropractic adjustments in animals.
- 13. Discuss treatment frequency and patient monitoring with chiropractic treatment.
- 14. Describe proper restraint for animals receiving physical examinations, acupuncture and/or chiropractic treatments.
- 15. Recognize relevant terminology for record keeping purposes.
- 16. Describe the normal grieving process, including assisting clients with grieving.
- 17. Discuss euthanasia, including appropriate indications for euthanasia and assisting veterinarian in the process.

Topics and Scope:

- I. Medical Record Keeping
 - A. Patient signalment and modality specific medical history
 - B. Subjective-Objective Assesment Plan (SOAP) record keeping format
 - C. Acupuncture point abbreviations
 - D. Chiropractic adjustment abbreviations
- II. Physical Examination
 - A. Body systems based examination
 - B. Acupuncture specific physical examination
 - C. Chiropractic specific physical examination
 - D. Handling to assist with examination, acupuncture, or chiropractic treatments

III. Preventative Medicine

- A. Preventable diseases
- B. Susceptibility factors
- C. Vaccination protocols
- D. Vaccination handling and administration
- E. Homeopathic treatments including Nosodes
- F. Diets for healthy animals
- G. Dental home care
- H. Client education

IV. Medication Administration

- A. Medication preparation
- B. Forms of medication
- C. Medication dosage calculations
- D. Frequency of administration
- E. Oral medication administration

V. Homeopathy

- A. History and theory
- B. Treatment strategy and therapeutic use
- C. Outcome assessment
- D. Terminology, client communication, and client education
- E. Commonly treated conditions and contraindications

VI. Acupuncture and Traditional Chinese Herbs

- A. History and theory
- B. Treatment strategy and therapeutic use
- C. Outcome assessment
- D. Terminology, client communication, and client education
- E. Commonly treated conditions and contraindications
- F. Acupressure, electrostimulation, and acu-laser therapy

VII. Chiropractic

- A. History and theory
- B. Treatment strategy and therapeutic use

- C. Outcome assessment
- D. Terminology, client communication, and client education
- E. Commonly treated conditions and contraindications
- VIII. Other Modalities
 - A. Physical therapy
 - B. Massage
 - C. Tellington Touch
 - D. Psychomotor therapy
 - E. Reiki
 - F. Western and Ayervedic herbs
 - G. Flower essences

IX. Nutrition

- A. Labels and manufacturer regulations
- B. Nutrients and common ingredients
- C. Nutritional needs based on life stage
- D. Nutritional needs based on disease status
- E. Nutrient requirements
- F. Rotational diets
- G. Food actions from a Chinese Medicine perspective
- H. Home preparation of diets
- X. Euthanasia
 - A. Quality of life and pain assessments
 - B. Hospice and end of life care
 - C. Recommended euthanasia procedures and assisting the veterinarian
 - D. Grief process and assisting the client

Assignment:

- 1. Reading in texts and handouts (20-40 pages/week)
- 2. Participation in mock client interactions and medical record keeping
- 3. Reflective essays (up to 5 assignments of approximately 1-3 pages each)
- 4. Presentations on complementary and alternative veterinary treatment
- 5. Participation in mock patient handling, restraining and physical examinations
- 6. Midterm(s) (up to 2), quizzes and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Reflective essays and presentation materials

Writing 20 - 35%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Presentations and mock client and patient activities

Skill Demonstrations 20 - 35%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, midterm examination(s), and final exam

Exams 30 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category 0 - 0%
