Total Out of Class Hours: 35.00 Total Student Learning Hours: 70.00

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

## **Catalog Description:**

Viticulture practices for summer including pest and disease monitoring and management, weed control, crop load assessment, canopy assessment, vine water status measurements and fruit quality improvement techniques.

## **Prerequisites/Corequisites:**

## **Recommended Preparation:**

Eligibility for ENGL 100 or ESL 100

#### **Limits on Enrollment:**

#### **Schedule of Classes Information:**

Description: Viticulture practices for summer including pest and disease monitoring and management, weed control, crop load assessment, canopy assessment, vine water status measurements and fruit quality improvement techniques. (Grade Only)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

## Certificate/Major Applicable:

Both Certificate and Major Applicable

## **COURSE CONTENT**

## **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

- 1. Identify and describe vineyard practices appropriate for the summer period.
- 2. Identify and discuss options for vineyard pest and disease management.
- 3. Demonstrate and explain various techniques for canopy and crop load assessments.
- 4. Develop a farm plan and budget appropriate for the summer period.

## **Objectives:**

At the conclusion of this course, the student should be able to:

- 1. Identify and explain appropriate vineyard practices to be implemented during the fruit ripening phase of vine growth.
- 2. Identify vine pests and diseases.
- 3. Explain and discuss life cycles of vine pest and diseases.
- 4. Discuss the specific life stage of vine pests and diseases that are most damaging to vines and fruit.
- 5. Discuss farming strategies for effective management of vine pests and diseases (sustainable, organic, biodynamic).
- 6. Assess the efficacy of a vine pest and disease management program.
- 7. Demonstrate proficiency in the use of a leaf pressure chamber and leaf porometer for determination of vine water status.
- 8. Discuss irrigation recommendations based on vine water status data.
- 9. Demonstrate proficiency in crop spatial distribution and crop load data collection.
- 10. Explain appropriate crop load adjustments based on spatial distribution and crop load data.
- 11. Demonstrate proficiency in canopy assessment.
- 12. Interpret canopy assessment data and make appropriate canopy management recommendations based on computational canopy assessment data.
- 13. Build a Gantt diagram time line that includes all summer vineyard practices.
- 14. Demonstrate proficiency in building a budget for all summer vineyard practices.

## **Topics and Scope:**

- I. Vine phenology
  - A. Vegetative phase
  - B. Reproductive phase
  - C. Fruit ripening phase
  - D. Root growth phases
- II. Vineyard practices implemented during fruit ripening phase
  - A. Pest and disease management
  - B. Canopy management
  - C. Crop load adjustment
  - D. Irrigation
- III. Vine pests and diseases
  - A. Identification
    - 1. In the field
    - 2. Under microscope
  - B. Life cycles of pest and disease organisms
  - C. Parts of vine susceptible to specific pests / diseases
  - D. Window periods and efficient timing when pests and diseases must be managed
  - E. Risk assessment for potential infestation/infection
  - F. Farming strategies for disease and pest management
    - 1. Conventional
    - 2. Sustainable
    - 3. Organic
    - 4. Biodynamic
  - G. Evaluation of pest and disease management program efficacy
    - 1. Costs
    - 2. Materials
    - 3. Labor
    - 4. Equipment
- IV. Vine water status and irrigation
  - A. Leaf water potential
  - B. Stomatal conductance
  - C. Use of leaf pressure chamber
    - 1. How the instrument works
    - 2. Collection of representative of data
    - 3. Interpretation of data
  - D. Use of leaf porometer
    - 1. How the instrument works
    - 2. Collection of representative of data
    - 3. Interpretation of data
  - E. Appropriate irrigation recommendations based on vine water status
- V. Canopy and Crop Load Management
  - A. Canopy assessment
    - 1. Richard Smart method
    - 2. Point Quadrat Analysis (PQA)
    - 3. Computational PQA
    - 4. Light readings
      - a. Canopy interior
      - b. Fruit zone
      - c. Ambient
    - 5. Interpretation of data
  - B. Crop load assessment

- 1. Determination of pounds of fruit per vine
- 2. Fruit cluster distribution mapping
- 3. Interpretation of data
- C. Appropriate recommendations for canopy and crop load management based on assessments.
- VI. Time-Lines and Budgets for Summer Vineyard Practices
  - A. Gantt Diagrams
  - B. Spreadsheets
  - C. Costs of all summer vineyard operations

#### **Assignment:**

- 1. Weekly reading (10-15 pages)
- 2. One vineyard budget
- 3. Lab activities
  - a. Use of leaf pressure chamber and porometer
  - b. Use of Point Quadrat
  - c. Entering collected data into spreadsheets
- 3. Two lab reports (1-2 pages each)
- 4. Two quizzes, one final exam.

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports

Writing 5 - 10%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Lab reports and budget

Problem solving 15 - 25%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Use of leaf pressure chamber and porometer, use of Point Quadrat, entering collected data into spreadsheets

Skill Demonstrations 30 - 40%

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes and final exam

Exams 40 - 50%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

None

Other Category 0 - 0%
