APED 222.9 Course Outline as of Fall 2025

CATALOG INFORMATION

Dept and Nbr: APED 222.9 Title: APP ELECTRICIANS 9TH SEM

Full Title: Apprentice Electricians, Ninth Semester

Last Reviewed: 3/28/2022

Units		Course Hours per Week	•	Nbr of Weeks	Course Hours Total	
Maximum	4.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	4.00	Lab Scheduled	0	4	Lab Scheduled	0
		Contact DHR	3.00		Contact DHR	52.50
		Contact Total	6.00		Contact Total	105.00
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00 Total Student Learning Hours: 210.00

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: APED 220.9

Catalog Description:

Students will be introduced to training related to electrician indentured apprenticeship. This is the ninth semester of a ten-semester program.

Prerequisites/Corequisites:

Recommended Preparation:

Course Completion of APED 220.8

Limits on Enrollment:

Indentured apprentice - apply and be accepted by the Redwood Empire Joint Apprenticeship & Training Committee (REJATC)

Schedule of Classes Information:

Description: Students will be introduced to training related to electrician indentured apprenticeship. This is the ninth semester of a ten-semester program. (Grade Only)

Prerequisites/Corequisites:

Recommended: Course Completion of APED 220.8

Limits on Enrollment: Indentured apprentice - apply and be accepted by the Redwood Empire Joint Apprenticeship & Training Committee (REJATC)

Transfer Credit:

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Describe and demonstrate electrical principles and regulations related to electricians' trade.
- 2. Apply best practices in practical environment related to electricians' trade.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Relate the available national electrical resources to responsibilities, privileges, and employment opportunities.
- 2. Demonstrate a working understanding of torque theory, products, and components.
- 3. Identify and explain fire alarm devices, appliances, functions, and systems.
- 4. Demonstrate the ability to work with fire alarm plans, specifications, inspection, testing, and maintenance
- 5. Describe and demonstrate knowledge, functions, and applications for Direct Current (DC) motor control devices, components, and systems.
- 6. Describe and demonstrate knowledge of electric vehicle code, equipment, and load calculations.
- 7. Explain and demonstrate best practices of electrical service installations.
- 8. Demonstrate a knowledge of Instrumentation theory, principles, and device applied functions.

Topics and Scope:

- I. Orientation, Level III
 - A. The National Electrical Benefit Fund (NEBF)
 - B. Keys to success-motivation and leadership
 - C. The National Labor Relations Board
 - D. The economics of unemployment
 - E. The realities of construction
- II. Torque, Level I
 - A. Torque theory

- B. Threaded fasteners basics
- C. Introduction to torque applications
- D. Torque products
- E. Real world electrical torque applications
- III. Fire Alarm Systems, Level I, Based on the Current National Electrical Code (NEC)
 - A. Introduction to fire alarm systems
 - B. Fundamentals and system requirements
 - C. Initiating devices
 - D. Notification appliances
 - E. Wiring and wiring methods
 - F. System interfaces and safety control functions
 - G. Emergency communications systems and emergency voice/alarm communications aystems
 - H. Plans and specifications
- IV. Fire Alarm Systems, Level II, Based on the Current NEC
 - A. Advanced detection topics
 - B. Public emergency alarm reporting systems and supervising stations
 - C. Single- and multiple-station alarms and household fire alarm systems
 - D. Inspection, testing, and maintenance
- V. Motor Control, Level III
 - A. DC motor control
 - B. Understanding analog signals
 - C. Analog pilot devices
 - D. Working with Solid-State devices in motor control
 - E. Variable frequency drives
 - F. Programmable logic controllers
 - G. Controlling synchronous, stepper, and servo motors
 - H. Networked motor control
 - I. Troubleshooting electrical systems
- VI. Electric Vehicle Charging Systems (EVCS-17), Based on the Current NEC
 - A. Electric vehicles
 - B. Electric vehicle charging equipment
 - C. The 2017 NEC
 - D. Advanced load calculations
 - E. Site assessment
 - F. Commissioning
 - G. Troubleshooting
- VII. Code, Standards, and Practices, Based on the Current NEC
 - A. Installing electrical services
 - B. Swimming pools, fountains, and similar installations
 - C. Understanding emergency and standby systems installation requirements
 - D. Over 1,000-Volt installations
 - E. Remote-Control, signaling, and power-limited circuits
 - F. 2020 NEC changes Part I
 - G. 2020 NEC changes Part II
- VIII. Instrumentation Introduction Module 1
 - A. Math
 - B. Science
 - C. Electrical theory
 - D. Meters and measurements
 - E. Instrumentation vocabulary
 - F. Process and instrumentation diagram interpretation

Assignment:

- 1. Homework assignments (1-2 sets per week)
- 2. Quizzes and examinations (4-6 per semester)
- 3. Class performances and field work (on-the-job demonstrations) of skill development, safety practices, equipment, and material handling

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or noncomputational problem solving skills.

Homework assignments; field work

Problem solving 10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances; field work

Skill Demonstrations 50 - 65%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and examinations

Exams 10 - 20%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category 5 - 10%
