COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will be able to:

1. Explain the design principles of residential plumbing systems.
2. Identify components of a residential plumbing system.
3. Apply plumbing system principles and components in the schematic design of a basic plumbing system.
4. Explain the design principles of residential mechanical systems.
5. Identify components of a residential mechanical system.
6. Apply mechanical system principles and components in the schematic design of a basic mechanical system.
7. Explain the design principles of residential electrical systems.
8. Identify components of a residential electrical system.
9. Apply electrical system principles and components in the schematic design of a basic electrical system.

Topics and Scope:

- I. Plumbing systems
 - A. Design principles
 - B. Components
 - C. Examples
 - D. Schematic design of basic plumbing systems
- II. Mechanical systems
 - A. Design principles
 - B. Components
 - C. Examples
 - D. Schematic design of basic mechanical systems
- III. Electrical systems
 - A. Design principles
 - B. Components
 - C. Examples

D. Schematic design of basic electrical systems

Assignment:

1. Reading: approximately 10 - 20 pages per week.
2. Identify plumbing, mechanical, and electrical components on working drawings.
3. On a simple floor plan, complete a schematic design for:
 - a) a basic plumbing system;
 - b) a basic mechanical system;
 - c) a basic electrical system.
4. 1-2 quizzes; final exam.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Component identification

Problem solving
30 - 50%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Schematic designs

Skill Demonstrations
30 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion, Short answer

Exams
20 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category
0 - 10%

Representative Textbooks and Materials:

Building Construction Illustrated, Ching, Francis D. K. et al., John Wiley & Sons, 2007.

Instructor prepared materials.
