

MATH 5 Course Outline as of Spring 2010**CATALOG INFORMATION**

Dept and Nbr: MATH 5 Title: INTRO TO LINEAR ALGEBRA
 Full Title: Introduction to Linear Algebra
 Last Reviewed: 2/8/2021

Units		Course Hours per Week		Nbr of Weeks	Course Hours Total	
Maximum	3.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	3.00	Lab Scheduled	0	17.5	Lab Scheduled	0
		Contact DHR	0		Contact DHR	0
		Contact Total	3.00		Contact Total	52.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

Catalog Description:

An introduction to linear algebra including the theory of matrices, determinants, vector spaces, linear transformations, eigenvectors, eigenvalues and applications.

Prerequisites/Corequisites:

Completion of MATH 1B or higher (VF)

Recommended Preparation:

Concurrent enrollment in MATH 1C or MATH 2

Limits on Enrollment:**Schedule of Classes Information:**

Description: An introduction to linear algebra including the theory of matrices, determinants, vector spaces, linear transformations, eigenvectors, eigenvalues and applications. (Grade Only)

Prerequisites/Corequisites: Completion of MATH 1B or higher (VF)

Recommended: Concurrent enrollment in MATH 1C or MATH 2

Limits on Enrollment:

Transfer Credit: CSU;UC.

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Major Applicable Course

COURSE CONTENT

Outcomes and Objectives:

Upon successful completion of the course, students will be able to:

1. Solve systems of linear equations using Gauss-Jordan elimination and Cramer's rule.
2. Define operations on matrices, invertibility, elementary matrices, orthogonal matrices.
3. Apply properties of determinants to matrices.
4. Evaluate determinants using row reduction techniques.
5. Define cofactors and adjoints of determinants to determine the inverse of a matrix.
6. Define properties of vectors, subspace, span, linear independence, bases, inner product spaces, and orthonormal bases.
7. Define and determine dimension rank of solution space of a system of linear equations.
8. Define kernel, range, rank, nullity, matrix representation of linear transformation, similarity, and change of basis.

Topics and Scope:

I. Matrices

- A. Systems of linear equations
- B. Gauss-Jordan elimination
- C. Operations on matrices
- D. Invertibility
- E. Elementary matrices
- F. Orthogonal matrices

II. Determinants

- A. Properties
- B. Evaluation by row reduction
- C. Cofactors and adjoints
- D. Formula for inverse of a matrix
- E. Cramer's rule

III. Vector Spaces

- A. Defining properties

- B. Subspace
 - C. Span
 - D. Linear independence
 - E. Basis
 - F. Dimension
 - G. Rank
 - H. Solution space of a system of linear equations
 - I. Inner product spaces
 - J. Orthonormal bases
 - K. Gram-Schmidt process
- IV. Linear Transformations
- A. Kernel
 - B. Range
 - C. Rank and nullity
 - D. Matrix representation of linear transformation
 - E. Similarity
 - F. Change of basis
- V. Eigenvectors and Eigenvalues
- A. Characteristic equations
 - B. Eigenspaces
 1. Diagonalization of matrices
 2. Orthogonal diagonalization of symmetric matrices
- VI. Applications may include:
- A. Differential equations
 - B. Fourier series
 - C. Quadratic forms
 - D. Gauss-Seidel method
 - E. Partial pivoting
 - F. Eigenvalue approximation
 - G. Others

Assignment:

1. Reading outside of class (0-50 pages per week)
2. Problem set assignments (15-30)
3. Midterm exams (2-5), quizzes (0-20) and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework assignments

Problem solving
5 - 20%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, Free response exams, quizzes

Exams
80 - 95%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%

Representative Textbooks and Materials:

Elementary Linear Algebra (9th). Anton, Howard. Wiley: 2005 (classic)

Linear Algebra and Its Applications (3rd). Lay, David C. Addison Wesley: 2003 (classic)
