COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will:

1. Apply theoretical knowledge base, including physiological, pathophysiological, spiritual and social concepts, in providing care.
2. Analyze patient care situations, and apply nursing process appropriately.
 - a. Assess/gather data related to assigned patients' physical and mental health deviation status.
 - b. Identify changes in physical and mental condition and report to the appropriate resource person in a timely manner.
 - c. Collaborate with resource nurses in establishing nursing diagnosis
 - d. Establish health care goals for assigned patients
 - e. Plan and implement nursing care in a timely, organized manner
 - f. Administer oral and topical medications safely
 - g. Evaluate the effectiveness of nursing care and revise plan as needed
3. Provide a safe, effective care environment.
4. Provide culturally sensitive care.
5. Promote the physiological, psychological and spiritual health of patients.
6. Communicate effectively:
 - a. Clearly and concisely to instructor and health care team
 - b. Therapeutically with patients and families
 - c. In the medical record: clearly, concisely, factually, and in accordance with legal standards and principles

7. Practice in accordance with professional and ethical standards.
8. Document observations, interventions, and effects of interventions accurately, using appropriate format.
9. Perform fundamental components of the role of the vocational nurse as a collaborating member of the multidisciplinary healthcare team.
10. Perform basic nurse assistant care on assigned patients.

Topics and Scope:

1. Orientation to clinical settings:
 - a. Physical environment
 - b. Fire, safety, disaster protocols, emergency codes, equipment
2. Policies and Procedures:
 - a. Computer charting and records Electronic Medical Records (EMR) and Pyxis medication systems
 - b. Charting forms EMR documentation of meds and nursing care.
 - c. Quality Assurance forms
 - d. Advance Directives
 - e. Consultation and referrals
 - f. Continuity of care.
3. Assignment Procedures:
 - a. Getting/Changing/What to look for
 - b. Pre-clinical Prep Work
4. Use of Data Sources in preparation for nursing care:
 - a. Kardex/Nursing Rand cards
 - b. Medical records charting and EMR
 - c. SRJC Clinical Prep Forms
 - d. Textbook references
5. Preparation/Use of Worksheets for organizing care.
6. Error Prevention.
7. Maintaining Patient Confidentiality.
8. Promoting Patient Rights.
9. Applying standard and special infection control procedures.
10. Tailoring physical assessment to patient:
 - a. Past medical history
 - b. Current medical problems
 - c. Co-morbidities
 - d. History of present illness
 - e. Hospital course according expected clinical pathways
 - f. Potential complications
 - g. Culturally appropriate
11. Recognizing and supporting patients' coping strategies:
 - a. Body image disturbances
 - b. Family interaction patterns
 - c. Role changes
 - d. Sexuality
12. Behavior Management:
 - a. Use of restraints (policies and procedures)
 - b. Observation rooms or other setting specific settings
13. Setting Priorities
 - a. One patient assignment
 - b. Two patient assignment

14. Setting health care goals
 - a. Usual clinical pathways
 - b. Individualized
15. Implementation of Plan of Care
16. Evaluating Effectiveness and Outcomes of Nursing Care
17. Fundamental components of the role of the vocational nurse vis a vis other members of the health care team.
18. Basic theory of vocational nursing care of the patient.
19. Therapeutic and professional communication both in verbal and in writing, including patients with psychiatric disorders.

Assignment:

1. Prep data base sheets on each individual patient assignment
2. Care of 1-2 patients per clinical day, with additional "pick-up" of patients after discharges
3. Development of concise worksheets, assessment tools, care cards, and care plans
4. Assessment of patients with multisystem effects
5. Administration of all medications within the vocational nurse (VN) scope of practice
6. Intravenous (IV) therapy within the VN scope of practice of a non-certified VN
7. Performance of all basic skills taught in prior labs with increasing proficiency.
8. Critical thinking of relating abnormal data findings to plan of care.
9. Monitoring of medication regimens and their relationship to labs and diagnostic values, creating medication and treatment cards.
10. Chart reviews, documentation written and electronic.
11. Fractional dosage examinations
12. Case study reports in written and verbal case presentation formats
13. Active participation in pre/post clinical conferences including concept maps and clinical case scenario presentations.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Portfolio, concept maps, community health resource paper, lab reports.	Writing 5 - 15%
--	--------------------

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Clinical case scenarios, virtual clinical excursions (VCE).	Problem solving 5 - 15%
---	----------------------------

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Clinical performance, implementation of nursing skills, ancillary health care requirements.	Skill Demonstrations 70 - 85%
---	----------------------------------

Exams: All forms of formal testing, other than skill performance exams.

None

Exams
0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
