COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will be able to:

1. Apply theoretical knowledge base, including physiological and psychological concepts, in preventing medical emergencies in the dental office.
2. Apply theoretical knowledge base, including physiological and psychological concepts, in responding to emergency medical emergencies.
3. Recognize and respond to the signs and symptoms of the most common medical emergencies that occur in a dental office, and discuss the importance of a thorough medical history for each patient.
4. Analyze emergency situations and implement appropriate protocols.
5. Obtain, interpret, and evaluate a completed medical and dental history for every patient.
6. Communicate effectively in interactions with the emergency health care providers and patients.
7. Demonstrate critical thinking behaviors in responding to emergency situations.
8. Recognize and prepare the items commonly found in a basic emergency kit.
9. Recognize and operate the equipment necessary to manage a medical emergency in a dental office.
10. Perform training drills using the "team approach" to prepare members of the dental team for medical emergencies.
11. Take, evaluate, and record the patient's vital signs and recognize the significance of the signs in relation to patient treatment.
12. Demonstrate the utilization of the Dental Drug Reference in relation to health history and treatment planning.

Topics and Scope:

- I. Preventing medical emergencies
 - 1. Complete and updated health history
 - 2. Patient vital signs
 - 3. Stress management
 - 4. Dental Drug Reference
- II. Emergency preparedness
 - 1. Staff preparation (CPR certification)
 - 2. Roles of each staff member
 - 3. Role playing and drills
 - 4. Early recognition
- III. Medical emergency procedures
 - 1. SRJC emergency protocol
 - 2. Emergency drugs and devices
 - 3. Airway patient maneuver
 - 4. Emesis/foreign body removal maneuver
 - 5. Broken instrument tip
 - 6. Syncope
 - 7. Hyperventilation
 - 8. Angina pectoris
 - 9. Cardiac arrest
 - 10. Myocardial infarction
 - 11. Respiratory arrest
 - 12. Asthma
 - 13. Diabetes: insulin shock/diabetic coma
 - 14. Epilepsy
 - 15. Cerebrovascular accident (stroke)
 - 16. Anaphylactic shock

Assignment:

- 1. Weekly chapter readings (10-20 pages), and complete end-of-chapter exercises.
- 2. Develop a medical emergency flow chart.
- 3. Develop a medical emergency evaluation.
- 4. Complete case studies.
- 5. Participate in role playing.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, case studies

Problem solving
10 - 15%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances: role playing, simulations; performance exams.

Skill Demonstrations
25 - 35%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes (4-6), midterm, final. Multiple choice, true/false, completion, case-based exams

Exams
40 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Professionalism: Criteria used for evaluation is in Dental Student Handbook. Medical emergency flowchart, medical emergency evaluation.

Other Category
15 - 25%
