Total Out of Class Hours: 140.00   Total Student Learning Hours: 210.00

Title 5 Category: AA Degree Applicable
Grading: Grade Only
Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP
Also Listed As:
Formerly:

Catalog Description:
A lower division Discrete Mathematics course including formal logic, Boolean logic, and logic circuits, mathematical induction, introduction to number theory, set theory, principles of combinatorics, functions, relations, recursion, algorithm efficiency, and graph theory.

Prerequisites/Corequisites:
Completion of Math 27 (formerly MATH 57).

Recommended Preparation:
Math 1A.

Limits on Enrollment:

COURSE CONTENT

Outcomes and Objectives:
 tudents will be able to :
1. Properly structure mathematical algorithms and proofs.
2. Do proofs by induction.
3. Apply elementary number theory.
4. Be able to apply set theory.
5. Apply combinatorics including use of pigeonhole principle,
  permutations, combinations, and probability.
6. Apply functions, inverse functions, and finite state automata.
7. Solve recurrence relations.
8. Analyze the efficiency of algorithms.

Topics and Scope:

1. Logic
  Logical form and equivalence, conditional statements, valid and invalid
  arguments, predicates, quantified statements, and arguments with
  quantified statements.
2. Elementary number theory.
  Direct proofs, conterexamples, rational numbers, divisibility, floor
  and ceiling functions, proofs by contradiction, proofs by
  contraposition, and algorithms.
3. Mathematical Induction
  Sequences, weak and strong induction, well ordering principle,

orrectness of algorithms.
algorithms.
 correctness of algorithms.   n
  rule, inclusion/exclusion, permatutations, combinations, and counting
  of multisets.
5. Set Theory
  Definitions, binary operations, properties, partitions, power sets,
  and Boolean algebras.
6. Functions
  Definition, one-to-one, onto, inverse functions, finite state automata,
  and composition of functions.
7. Recursion
  Sequences defined recursively, solving recurrence relations by
  iteration, and solutions of second-order linear homogeneous recurrence
  relations with constant coefficients.
8. Algorithm Efficiency
  Comparison of real valued functions and their graphs, O-notation,
  and calculations of efficiency.
9. Relations
  Relations on sets, reflexivity, symmetry, transitivity, and equivalence
  relations.
10.Graph Theory
  Definitions, paths and circuits, matrix representations, and trees.

Assignment:

1. Students will have daily outside readings, problem set assignments
from required text(s), or instructor chosen supplementary materials.
2. Instructional methodology may include, but not be limited to, lecture,
demonstrations, oral recitation, discussion, supervised practice,
independent study, outside project(s), or other assignments.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills
and/or require students to select, organize and explain ideas
in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.	Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that
demonstrate competence in computational or non-
computational problem solving skills.

Homework problems, Quizzes, Exams	Problem solving 30 - 90%

Skill Demonstrations: All skill-based and physical
demonstrations used for assessment purposes including skill
performance exams.

None		Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion		Exams 10 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None		Other Category 0 - 0%

Representative Textbooks and Materials:
1. Discrete Mathematics, Second Edition by Susanna S. Epp
   PWS Publishing Company
   ITP, An International Thompson Publishing Company, 1995.
2. Discrete Mathematics, Fifth Edition by Richard Johnsonbaugh
   Prentice Hall, 2000.
