Total Student Learning Hours: 52.50

Title 5 Category:	AA Degree Applicable
Grading:	Grade or P/NP
Repeatability:	00 - Two Repeats if Grade was D, F, NC, or NP
Also Listed As:	
Formerly:	PHYS 3B

Catalog Description:

Lab experiments to accompany Physics 21.

Prerequisites/Corequisites:

Course Completion of PHYS 20L; AND Course Completion or Current Enrollment in PHYS 21

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: Lab experiments to accompany Physics 21. (Grade or P/NP) Prerequisites/Corequisites: Course Completion of PHYS 20L; AND Course Completion or Current Enrollment in PHYS 21 Recommended: Limits on Enrollment: Transfer Credit: Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Collect and analyze experimental data related to alternating current (AC) and direct current (DC) circuits, magnetism, optical instruments, gas spectra and radioactivity.
- 2. Plot, curve fit, and interpret the data using spreadsheet software.

Objectives:

Students will be able to:

1. Explain concepts of electric charge, current, resistance, potential difference and EMF.

2. Construct and analyze DC and AC circuits containing various combinations of resistance, coils and capacitors.

3. Measure voltages and currents using a digital multimeters and/or oscilloscopes.

4. Measure magnetic fields and determine the direction of currents induced by changing magnetic fields.

- 5. Explain concepts involving the formation of images by pin holes, mirrors and lenses.
- 6. Construct a microscope and telescope and explain their operation.
- 7. Determine the wavelength of light from a gas discharge tube using a spectroscope.

8. Measure the activity of a radioactive source.

Topics and Scope:

Topics covered include:

- 1. Electrostatics
- 2. Current, resistance, voltage, EMF
- 3. Resistors in series and parallel
- 4. Magnetic fields
- 5. Electromagnetic induction and transformers

- 6. Inductance, capacitance and resonance
- 7. Images formation
- 8. Microscopes and telescopes
- 9. Analysis of light by a spectroscope
- 10. Radioactive decay and the inverse square law of radiation

Assignment:

- 1. Laboratory experiments and reports (12 16)
- 2. Quizzes (0 10)
- 3. Final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and final exam

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Representative Textbooks and Materials:

Instructor prepared lab manual

Problem solving 0 - 0%	

Writing

60 - 90%

Skill Demonstrations 0 - 0%

Exams 10 - 40%

Other Category 0 - 0%
