COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Master sociological approaches to examining self and society with respect to theoretical models, assumptions, and contemporary implications.
- 2. Explain the relationship between broad structural changes in society, and the emotional labor strategies of everyday life.
- 3. Analyze how social status is produced interactionally, including variations over the life course, and across social roles.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Distinguish between psychological and sociological approaches to examining self and society.
- 2. Explain the relationship between micro and macro experiences in the social world.
- 3. Illustrate how gender, race/ethnicity, etc. are negotiated through social interaction.
- 4. Analyze how impression management strategies are used in everyday life.
- 5. Summarize the contributions of Symbolic Interactionism to Sociology.
- 6. Employ sociology of emotions concepts, such as feeling rules and emotion management.
- 7. Demonstrate how social roles are constructed and maintained.
- 8. Identify how agents of socialization, such as mass media, family, and government, shape reality for members of society.
- 9. Interpret the relationships between physical self, identity, formation and social processes.
- 10. Analyze how changes in personal sense of self, reflect changes in institutions, such as the economy, medicine, law, etc.
- 11. Use social science research methods to study micro-level social interaction.

Topics and Scope:

- 1. Introduction to the world of microsociology, such as how our selves and emotions are constructed through social interaction
- 2. The three major sociological theories: conflict, functionalism, and symbolic interactionism; and the difference between macro- and microsociology
- 3. The historical development of symbolic interactionism (i.e., microsociology) through Mead, Cooley, Blumer, and Goffman
- 4. Dramaturgy, sociology of cognition, and sociology of emotions as related to symbolic interactionism
- 5. Relationships between the physical self, identity formation, and social processes
- 6. Self-development and socialization through agents of socialization such as the family, educational institutions, and the mass media
- 7. The social construction of symbols, language, and roles
- 8. Impression management strategies used in everyday life
- 9. Connections between social structures (e.g., race, gender, class, disability status etc., as well as social institutions) and ongoing production of selves
- 10. Cultural change and its impact on the ongoing production of selves
- 11. Relationship between structure and agency
- 12. Critical assessment of research methods such as observation and/or conversation analysis, interviewing, ethnography, used by sociologists to conceptualize, gather, and interpret data in this field

Assignment:

- 1. Students will read approximately 1-2 chapters per week, or 3 journal articles.
- 2. Students will write 4000 to 5000 words over the semester.
 - A. critical-thought essays
 - B. conduct brief research projects using ethnographies, and/or observations of popular culture
- 3. Two objective and/or essay exams

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Essays, research papers

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.
