COURSE CONTENT

Outcomes and Objectives:

Emphasis on wellness. Care of the obstetrical and pediatric client in a variety of clinical settings (hospital, clinics, nursery school, home and residential care settings).

1. Demonstrate safety principles in care of postpartum, infants, and pediatric clients (i.e. positioning techniques, and checking I.D. bands).
2. Safely administer and document oral and injectable medications.
3. Identify rationales and demonstrate ability to apply principles of special precautions (i.e. communicable diseases, universal precautions).
4. Identify normal growth and development of care of the acutely ill or common chronic illnesses in outpatient and residential care settings.
5. Demonstrate assessment techniques of the postpartum client.
6. Demonstrate assessment techniques of the newborn client and identify the universal needs of the newborn.
7. Participate in patient teaching and identify needs of family unit.

Topics and Scope:

1. Application of and transfer of theory content as it relates to:
 - A. Normal pregnancy.
 - B. Prenatal care.
 - C. Normal labor and delivery.
 - D. Postpartum care.
2. Complications of maternal care.
 - A. Pregnancy.
 - B. Labor and delivery.
 - C. Puerperium.

3. Normal growth and development from infancy through adolescence.
 - A. Normal newborn, the child, the adolescent.
 - B. Physical, mental, and social needs.
4. Care of the sick child.
 - A. Common problems.
 - B. Common nursing procedures.
 - C. Administration of medications.

Assignment:

1. Nursing care plans: due each week, one per assigned patient(s).
2. Reaction papers: one for each satellite assignment (i.e. nursery school, well-baby clinic, pre-natal class, residential care, and home care settings).

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.
