COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course the student will be able to:

1. Describe the legal rights of patients and act in an ethical manner that will communicate appreciation, respect and protection for these rights.
2. Describe the dynamics and behavioral manifestations of assigned patients with psychiatric disorders.
3. Participate with other nursing team members in making observations of the patient.
4. Based upon the observations of the patient, participate with other team members in developing a psychiatric treatment program.
5. Implement the treatment program.
6. Evaluate the effectiveness of the treatment program.
7. Describe the various psychiatric treatment modalities and apply this knowledge when working with patients.
8. Describe elements necessary for a therapeutic ward milieu and participate with other team members to build and maintain this milieu.
9. Describe the characteristic therapeutic effects and adverse effects of the psychotropic drugs and safely prepare, administer, and chart psychotropic medication according to specific hospital policy.
10. Accurately and objectively report and record observations of patient behavior and progress.
11. Demonstrate assertiveness and professionalism with patients and nursing team members.
12. Identify stressors affecting his/her personal and professional life.

13. Demonstrate an ability to utilize coping skills effectively.
14. Reflect on and document professional and personal growth.

Topics and Scope:

1. Professional ethics, legal issues, commitment procedures.
2. Overview of mental health and history of psychiatry.
3. Communication theory, interpersonal and therapeutic communication.
4. The therapeutic relationship, nursing process and documentation.
5. Developing and implementing psychiatric nursing care plans.
6. Effects of stress on general and mental health.
7. Mental status assessment, observation, reporting and recording.
8. Psychopharmacology-administration of psychotropic medications.
9. Psychiatric disorders.
10. Treatment modalities.

Assignment:

1. Reading assignments in preparation for each clinical day (from required text and library, 40-50 pages per week).
2. Research and compile one written case study on assigned patient.
3. Required reading of specific supplemental material (discuss in clinical conferences).
4. Develop one-to-one relationship with selected patients and write six process recordings of these interactions.
5. Skills Lab: Participate in role playing student/patient scenerios.
6. Administer medications and treatments to select group of patients.
7. Produce nine behavioral notes per week for approximately eight weeks.
8. Perform specific designated therapeutic intervention as demonstrated in skills lab.
9. Write personal journal of experience.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Term papers, Process recordings, Personal Journal

Writing 10 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Field work, Nursing care plans, clinical conferences

Problem solving 20 - 40%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Field work, Performance exams, Role-playing

Skill Demonstrations
50 - 70%

Exams: All forms of formal testing, other than skill performance exams.

None

Exams
0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
