## **COURSE CONTENT**

### **Outcomes and Objectives:**

Upon completion of this course students will be able to:

1. Describe and evaluate the developmental effects of socializing experiences, interactions and environments using an ecological systems model.
2. Demonstrate understanding of the emotional, social, and moral development including the emergence of identity and self-esteem with emphasis on the attachment/separation cycle.
3. Describe the diversity in family interactional patterns and structures as they relate to the socialization of children.
4. Recognize characteristics of stress and examine the consequences of stress in families.
5. Evaluate the role of cultural values, attitudes and morals in the process of socialization.
6. Examine conflict management and problem solving strategies for children and families.
7. Analyze the socializing influences of school, childcare, peers and media on children.
8. Identify a variety of community services needed by families, including health, social services, mental health, developmental and family support services.
9. Develop an awareness of professional issues and the need for incorporating professional ethics in educational and caregiving practices.
10. Identify characteristics of child abuse, the procedures for child abuse reporting, and the responsibility for actions as

mandated by law.
