COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

- 1. Compare and contrast normal versus abnormal growth and development in children of all ages.
- 2. Analyze a hypothetical hospital scenario relating appropriate responses in children of all ages.
- 3. Participate in a hypothetical teaching scenario for parents coming to an ambulatory care clinic with specific childrening issues.
- 4. Articulate the signs/symptoms of child neglect/abuse and adapt a teaching plan to include reporting and family support measures to be taken in the instance that abuse is suspected.
- 5. Plan an appropriate nutritional meal for any age child.
- 6. Articulate special safety and accident prevention plans needed for children of all ages.

Topics and Scope:

- 1. Growth & development of infants and toddlers.
- 2. Nutritional and safety needs of infants and toddlers.
- 3. Breastfeeding versus bottlefeeding and normal feeding routines of infants and toddlers.
- 4. Normal growth & development patterns of preschool to preadolescence.
- 5. Nutritional and safety needs of preschool to preadolescent children.
- 6. Normal growth and devleopment during adolescent years.
- 7. Nutritional and safety needs of adolescents.

- 8. Growth & development patterns of all ages in reference to the model Erickson's growth and development stages through the lifespan.
- 9. Care needs of all ages of hospitalitalized children.
- 10. Child Abuse: The nurse's role in determining and reporting child abuse.

Assignment:

- 1. Reading Assignments: Approximately 50 pages per week.
- 2. Videos: Approximately 2 per week.
- 3. PowerPoint Presentations: Approximately 2 per week.
- 4. Written Assignments:
 - a. 10-20 theory objectives per week.
 - b. Paper comparing & contrasting normal versus abnormal development.
 - c. Developmental assessment paper on normal child ages 1-5 years.
 - d. Paper outlining the norms of nutrition, rest, social interaction and immunization schedules for children during the developmental phases.
- 5. Čase study scenarios: 1 per week.
- 6. Teaching scenario: one submitted in writing as an example from the related field of study.
- 7. Child abuse scenario: one submitted in writing as to the assessment and plan of action with a focus on the developmental age of the child.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework

Writing 5 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Case study and teaching scenarios

Problem solving 10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

Exams 60 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None	Other Category 0 - 0%
