COURSE CONTENT

Outcomes and Objectives:

The students will:

- 1. Create and modify images for use on the World Wide Web.
- 2. Optimize graphics for Web use.
- 3. Explore color palettes and dithering.
- 4. Create complex image maps.

Topics and Scope:

- 1. Photoshop and ImageReady feature and interface overview
- 2. Web image formats
- 3. Image optimization
- 4. Background images
- 5. Color palettes
- 6. Dithering
- 7. Image Maps

Assignment:

- 1. Create GIF and JPEG images for use on the Web.
- Optimize images for Web use.
 Create animation from supplied images.
- Create seamless tiled background images.
 Use program features to eliminate browser dithering.
 Create image maps with multiple regions.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Exams

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

Other: Includes any assessment tools that do not logically fit into the above categories.

None
