		Contact Total	3.00		Contact Total	52.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CET 52

Catalog Description:

Introduction to the principles and techniques of photogrammetry with applications in surveying and engineering.

Prerequisites/Corequisites:

CEST 50B (formerly CET 50B) or equivalent with grade of "C" or better.

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: Basic principles & techniques with application in surveying & engineering. (Grade Only)

Prerequisites/Corequisites: CEST 50B (formerly CET 50B) or equivalent with grade of "C" or better.

Recommended:

Limits on Enrollment:

Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Not Certificate/Major Applicable

## **COURSE CONTENT**

### **Outcomes and Objectives:**

The students will:

1. Define and illustrate the general applications of photogrammetry.
2. List and demonstrate the photographic process as it applies to aerial mapping.
3. Identify and demonstrate the types of optics used in aerial cameras.
4. Determine and calculate the appropriate geometry for various lens settings and elevations of the aerial camera for a given situation.
5. Define and illustrate stereoscopy and its application to aerial mapping.
6. Demonstrate their skill in photo interpretation as applied to surveying and engineering works.
7. Demonstrate radial line mapping and its application.
8. Identify and illustrate the use of stereo plotting instruments.
9. Describe the use of ground control and flight planning.

### **Topics and Scope:**

1. History and general application of photogrammetry.
2. Photographic process optics and aerial cameras.
3. Photographic geometry and its application.
4. Practical application of stereoscopy.
5. Photo interpretation and its application to surveying and engineering.
6. Radial line mapping.
7. Stereometer type plotters.
8. General procedures and use of stereo plotting instruments.
9. Ground control and flight planning.
10. Analytical photogrammetry and special applications.

## Assignment:

1. Photogrammetry applications, topographic and planimetric maps.
2. Camera systems, single large and small scale formats.
3. Photographic scales, analysis of vertical aerial photos.
4. Flying heights and altitudes.
5. Relief (radial) displacement - mapping techniques.
6. Stereoscopic parallax and stereoviewing.
7. Flight lines and photographic overlap.
8. Flight planning.
9. Ground control for mapping.
10. Applications of airphoto interpretations for the surveyor and engineer.
11. Remote sensing applications and techniques.

## Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing  
0 - 0%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Exams

Problem solving  
30 - 40%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams

Skill Demonstrations  
10 - 20%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, Matching items, Completion

Exams  
20 - 40%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Class Participation

Other Category  
0 - 10%
