### **COURSE CONTENT**

### **Outcomes and Objectives:**

Upon completion of this course, the students will be able to:

- 1. Define common insurance medical and diagnostic terms.
- 2. Describe the major federal, state, and private health insurance plans.
- 3. Abstract from patient records information for completing insurance plans.
- 4. List criteria for eligibility, benefits, payments, time lines, billing limitations, deductibles, and forms for major plans.
- 5. Explain the procedures and criteria for prior authorizations for major plans.
- 6. Correctly choose appropriate coding books according to plan regulations.
- 7. Describe the differences between procedural and diagnostic coding books.
- 8. Code basic levels of service and procedures properly, using the appropriate coding books and specific guidelines for each plan.
- 9. Accurately complete a series of health insurance claims for various plans, given the patient's chart notes and ledger cards.
- 10. Use the computer to develop skills in completing health claims forms and choosing procedural and diagnostic codes.
- 11. Interpret benefits received and apply correctly to patient and office accounting records.
- 12. Locate errors on medical insurance claim forms.
- 13. Complete insurance claim tracer forms.
- 14. List specific coding tips for specific plans.
- 15. Develop procedures for handling denials, rejections, delinquent filings, and appeals.

# **Topics and Scope:**
