COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Differentiate between philosophy and other disciplines: e.g., physics, literature.
2. Differentiate between fields of philosophy: e.g., aesthetics; epistemology; metaphysics; political philosophy; philosophy of religion; philosophy of mind.
3. Examine key topics and questions within the above fields: e.g., God and religion; the nature of truth; philosophy of mind; free will and determinism; and morality.
4. Summarize, analyze, and evaluate key arguments addressing the above topics.
5. Analyze and evaluate contemporary applications of the above arguments.

Topics and Scope:

1. Philosophical methods: logic; rationalism; empiricism.
2. The nature of philosophical issues: overview of key philosophical fields and topics; relationship between philosophical issues and worldviews.
3. God and religion: existence and nature of God; relationship between religion and science; relationship between religion and morality.
4. The nature of reality: relationship between being and becoming; relationship between mind and matter.
5. The nature of truth: relationship between opinion and truth; relationship between truth and knowledge; coherence; correspondence;

and pragmatic theories.

6. Personal identity: relationship between self and body; relationship between self and thought, relationship between self and consciousness; relationship between self and society; arguments justifying the claim there is no self.
7. Free Will: nature of free will; determinism, relationship between will and the good life; relationship between free will and existential issues.
8. Morality: nature of the good life; relationship between religion and morality; subjectivism; relativism; hedonism; egoism and altruism; duty-based morality; consequentialism; virtue ethics.
9. Justice: liberty; and equality: civil rights; natural rights; human rights; retributive justice; distributive justice.

Assignment:

Assignments vary, but typically include the following:

1. Regular reading assignments from course texts and supplementary material. Number of pages vary, depending upon difficulty of topic, concepts, and arguments. Typical reading assignment is 15-25 pgs.
2. Discussion of regular journal assignments.
3. Regular or occasional quizzes which cover the assigned readings. Quizzes may be either multiple choice or short essay.
4. At least two midterm examinations. Each exam is approximately one hour long. Students must write in-class essays in response to questions on material covered in class and in texts.
5. A final examination - approximately 2-3 hours long. Students must write in-class essays in response to questions on material covered in class and in texts.
6. Students may also be required to write a term paper in which they research an issue raised in class and defend a particular position on that issue. Length will vary, depending upon difficulty of topic, concepts, and arguments. Typical papers 5-10 pages.
7. Students will be encouraged to participate in class discussion.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, POSSIBLE TERM PAPER

Writing
55 - 75%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, SHORT ESSAY, QUIZZES, ESSAY EXAMS

Exams
15 - 35%

Other: Includes any assessment tools that do not logically fit into the above categories.

CLASS PARTICIPATION

Other Category
10 - 20%
