COURSE CONTENT

Outcomes and Objectives:

Students are expected to:

1. Listen frequently and carefully to recorded music, and to recognize compositions, composers, musical techniques, and the simpler forms.
2. Expand their musical experience by reading, discussing, and listening in order to realize that music is and has been an integral part of western culture and civilization.
3. Develop their musical listening skills by (a) acquiring the concentration for longer attention spans in listening, (b) hearing more specific musical details, (c) detecting aurally more subtle features in interpretation, performance techniques, and nuance.
4. Understand and try to explain that the language of music can not always be translated into the language of words; that music's ultimate meaning lies in the sounds themselves.
5. Name, relate, and identify important musical terminology as it has a significance in both the biographical details and the compositions of important composers.

Topics and Scope:

1. The Materials of Music: An introduction to the listening experience, the three planes of listening, areas of meaning in music; including melody, harmony, rhythm (meter, syncopation), tempo, dynamics, timbre, form, orchestration, instruments, style, and notation (with several sub-headings in some areas).
2. The Baroque Era, which includes the Baroque, keys, scales, major-minor system, beginnings of opera, the suite, the concerto, the fugue, repeated bass patterns, and such composers as Pachelbel, Monteverdi, Gabrieli, Purcell, Vivaldi, Bach, Handel, & Gluck.

3. More materials of Music whose parts not covered in the above assignment, and Viennese Classicism, which includes symphonies, concertos, operas, chamber music, and solo sonatas by Haydn, Mozart, Beethoven, Schubert, & Gluck.
4. Late 19th Century which covers a few compositions from about 1890 to 1925, including Post-Romanticism, Impressionism, Nationalism, Post-Impressionism, and the French Six; this last portion of the class is brief and covered in two or three lectures; with the listening and written examinations, this material covers about a little over a chapter a meeting. We anticipate being able to show Amadeus to this class in the near future.

Assignment:

1. Four reading assignments of at least 12 or more chapters for a total of 50 chapters for the semester, plus five other recommended to aid the understanding of assigned materials.
2. A listening list of four programs containing a total of 30 compositions to be listened to for the purpose of listening tests.
3. Both numbers one and two will for the most part be elaborated upon in class sessions to bring to the students attention the important aspects of the reading material and to point out some of the things that they should be listening for in the assigned compositions.
4. In addition to these three, additional music is used as it relates to the topics under consideration and in order to enhance the accuracy of the student's listening experiences.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Exams, LISTENING QUIZZES

Problem solving
10 - 15%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

LISTENING QUIZZES

Skill Demonstrations
10 - 20%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, Matching items, Completion

Exams
70 - 80%

Other: Includes any assessment tools that do not logically fit into the above categories.

ATTENDANCE

Other Category
5 - 10%
