Total Out of Class Hours: 66.00 Total Student Learning Hours: 99.00

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 27 - Exempt From Repeat Provisions

Also Listed As:

Formerly: EMC 275.1

Catalog Description:

Application of basic principles of cardiac anatomy and physiology to recognize basic heart arrhythmias. Designed for health and allied care personnel who assume responsibility for cardiac monitoring in the pre-hospital and hospital setting.

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Schedule of Classes Information:

Description: Basic principles of cardiac anatomy & physiology to recognize basic heart arrhythmias. Course for health & allied care personnel who assume reponsibility for cardiac monitoring in the pre-hospital or hospital setting. (Grade Only)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Transfer Credit:

Repeatability: Exempt From Repeat Provisions

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will be able to:

- 1. Identify and define 9 structures of the heart and their basic function.
- 2. Define the following terms related to cardiac electrophysiology:
 - A. Depolarization
 - B. Repolarization
 - C. Action potential
 - D. Refractory states
- 3. Describe the sequence of cardiac activation and recovery, and relate this information to the electrocardiogram (EKG) configuration.
- 4. Demonstrate a systematic method of EKG interpretation.
- 5. Identify normal waveforms for monitoring leads II, modified cardiac lead (MCL) 1 and 6.
- 6. Classify arrhythmias according to site, mechanism and severity.
- 7. Identify 15 arrhythmias.
- 8. Recognize and describe 4 conduction defects.
- 9. Identify 3 premature and escape beats and state the mechanism for each.
- 10. Discuss possible nursing and medical interventions for 15 major arrhythmias.
- 11. Identify pacemaker rhythms.

Topics and Scope:

- 1. Overview
 - A. Cardiac anatomy and physiology
 - B. Myocardial blood supply
 - C. Cardiac conduction system
- 2. EKG Interpretation

- A. Vectors, lead placements
- B. Waves and measurements
- C. Analysis of EKG rhythm strips
- D. Modified cardiac leans
- 3. Conduction System
 - A. Anatomy
 - B. EKG analysis
 - C. Sinus rhythms
- 4. Cardiac Rhythms
 - A Atrial
 - B. Junctional
 - C. Ventricular
- 5. Heart Blocks Conduction Defects

Assignment:

- 1. Read approximately 10 pages per week.
- 2. Identify approximately 20 rhythm strips per week.
- 3. Exam identifying 15 strips rhythm strips

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Identify 20 rhythm strips

Writing 5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or noncomputational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, Performance exams

Skill Demonstrations 20 - 45%

Exams: All forms of formal testing, other than skill performance exams.

Completion, Identify EKG rhythm strips

Exams 45 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category 0 - 0%

Representative Textbooks and Materials:

EKG Workbook by Huff, Lippincott 6th ed. 2004 Instructor prepared materials.
