COURSE CONTENT

Outcomes and Objectives:

Students who successfully complete the course will:

1. Identify the progressive stages of the disease of chemical dependency.
2. List the most commonly abused drugs and describe their effects on the body.
3. Analyze the pros and cons of drug testing in the work place.
4. Dramatize through role playing the family dynamics of a successful alcohol and drug intervention.
5. Evaluate a minimum of two treatment modalities for chemical dependency recovery.
6. Analyze in writing how a given drug will affect the fetus of a pregnant woman.

Topics and Scope:

1. The Chemical Dependency Process
2. General Pharmacological Principles
3. The Metabolism of Alcohol
4. Disulfiram (Antabuse)
5. Sedative Hypnotic
 - a. Barbiturates
 - b. Benzodiazepine
6. Opiates
7. Stimulants
 - a. Amphetamines
 - b. Cocaine
8. Psychedelics
9. Legal Drugs
10. Medical Aspects of Psychoactive Drug Use
11. Screening Tests, Intervention, Detoxification

- 12. Chemical Dependency Treatment
- 13. Family Aspects of Addiction

Assignment:

READING ASSIGNMENTS:

Students will be required to read and study the assigned chapters in the textbook and other selected reading in journals and hand-outs. Examples of recommended reading:

The Journal of Chemical Dependency, Dependency Counselors

WRITING ASSIGNMENTS:

One 5-page critique on any treatment modality. Give the pros and cons of each method with appropriate documentation. The paper must be typed and use the MLA format.

One 3-page analysis of how a given drug will affect the fetus of a pregnant mother. Use the same writing criteria as above.

OUTSIDE ASSIGNMENTS:

1. Visit a treatment program and present a typed, 2 page, double spaced critique of that on-site visit.
2. Become familiarized with the PHYSICIAN DESK REFERENCE (PDR) by locating and writing the page number from which the assigned drugs will be found.

ASSIGNMENTS THAT DEMONSTRATE CRITICAL THINKING:

1. Writing assignment demonstrates application of concepts regarding effective treatment programs.
2. Writing assignments demonstrates the ability to apply the principles of drug actions on various human systems.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Essay exams, Term papers, Analysis/critiques
--

Writing 25 - 35%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice

Exams
65 - 75%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%

Representative Textbooks and Materials:

1. Text: Drug Guide, Deglin and Vallerand, Davis Publishing, 5th ed. 1997
2. Handouts: Free materials of the National Institutes of Alcohol and Drug Abuse.
