		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00

Total Student Learning Hours: 122.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CSKL 100

Catalog Description:

Instruction in advanced arithmetic skills designed for Health Science students. Prepares students for success in medication administration through advanced skills development of operations with fractions, decimals, and percents. Teaches students to convert between metric, household, and apothecary systems, using proportion, equation, and formula methods. Introduces and develops advanced skills in calculating drug dosages in preparation for safe administration of medications in the health field.

Prerequisites/Corequisites:

Completion of CSKLS 371 or CSKLS 368B or higher; or Qualifying Test Score in Math

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:**Schedule of Classes Information:**

Description: Instruction in calculating drug dosages utilizing metric, household and apothecary systems. Designed for Health Science students. (Grade Only)

Prerequisites/Corequisites: Completion of CSKLS 371 or CSKLS 368B or higher; or Qualifying

Test Score in Math
Recommended: Eligibility for ENGL 100 or ESL 100
Limits on Enrollment:
Transfer Credit:
Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Compute advanced operations in addition, subtraction, multiplication, and division of whole numbers, fractions, and decimals;
2. Solve complex word problems involving multiple operations;
3. Convert metric, household, and apothecary formulas;
4. Use various methods to solve basic pharmacology problems;
5. Calculate drug dosages for oral and parenteral administration;
6. Identify medication errors in a case study or in situational word problems and respond with a solution.

Topics and Scope:

1. Advanced skills development of operations
 - a. Addition
 - b. Subtraction
 - c. Multiplication
 - d. Division of
 - 1) Whole numbers
 - 2) Fractions
 - 3) Decimals
 - 4) Measurements
2. Conversions as applied to Health Sciences
 - a. Fractions
 - b. Decimals
 - c. Percents
 - d. Metric

- e. Household
- f. Apothecary
- 3. Health science problems using various methods
 - a. Ratio-proportion
 - b. Equations
 - c. Formulas
 - d. Dimensional analysis
- 4. Measurement systems and their application in basic pharmacology problems and conversions within and between systems
 - a. Household
 - b. Metric
 - c. Apothecary
- 5. Simple and complex drug dosage calculations for safe administration
 - a. Oral
 - b. Parenteral
 - c. Pediatric--weight and body surface area
- 6. Standard abbreviations and conventions of drugs
 - a. Labels
 - b. Orders
 - c. Records
 - d. Reconstitution of powdered drugs
- 7. Typical errors involving dosage calculations
 - a. computational errors
 - b. dosage errors
 - c. safety assessment errors
 - d. errors in selection of devices used to administer medication

Assignment:

- 1. Approximately 13 to 20 homework assignments
- 2. Two exams
- 3. Computer-assisted learning and/or other lab assignments
- 4. Comprehensive final exam
- 5. Written responses to case studies and situational word problems containing medication errors

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written responses to case studies

Writing 0 - 5%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems

Problem solving 5 - 10%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Lab assignments

Skill Demonstrations
5 - 10%

Exams: All forms of formal testing, other than skill performance exams.

Tests and final exams

Exams
75 - 85%

Other: Includes any assessment tools that do not logically fit into the above categories.

Lecture and lab participation.

Other Category
5 - 5%

Representative Textbooks and Materials:

Medical Dosage Calculations, 9th edition. Olsen, June; Giangrasso, Anthony Patric; Shrimpton, Dolores; Dillon, Patricia. Pearson Prentice Hall, 2008.

Dosage Calculations Made Incredibly Easy, 2nd edition. Brunner, Lillian S. Springhouse Publishing Co., 2001.

Dimensional Analysis for Meds, 2nd edition. Curren, Anna. Thomson Learning, 2002.

Instructor prepared materials.
