

BOTANY 60 Course Outline as of Fall 2008**CATALOG INFORMATION**

Dept and Nbr: BOTANY 60 Title: FIELD BOTANY

Full Title: Field Botany

Last Reviewed: 1/28/2019

Units	Course Hours per Week		Nbr of Weeks		Course Hours Total	
Maximum	4.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	4.00	Lab Scheduled	3.00	17	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	6.00		Contact Total	105.00
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00

Total Student Learning Hours: 210.00

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: BOTANY 30A

Catalog Description:

Survey of the vegetation and flora of Northern California. Includes the identification and ecology of component species, and methods of vegetation and floristic study. Field trips required.

Prerequisites/Corequisites:**Recommended Preparation:**

Completion of or concurrent enrollment in ENGL 100 or ESL 100.

Limits on Enrollment:**Schedule of Classes Information:**

Description: Survey of the vegetation and flora of Northern California. Includes the identification and ecology of component species and methods of vegetation and floristic study. Field trips required. (Grade or P/NP)

Prerequisites/Corequisites:

Recommended: Completion of or concurrent enrollment in ENGL 100 or ESL 100.

Limits on Enrollment:

Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Certificate/Major Applicable:

Major Applicable Course

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course students will be able to:

1. Examine the nature of scientific inquiry and the influence of this discipline on the world's civilizations.
2. Use principles of plant classification.
3. Describe basic vegetative and reproductive morphology of seed plants, including associated vocabulary.
4. Evaluate the environmental factors influencing plant distribution.
5. Describe the physiography and climate of California.
6. Describe the geological history, evolution and adaptation of the California flora and vegetation.
7. Examine the principles of ecological succession.
8. Identify the major vegetation types (communities) of California, including the ecology and taxonomy of the dominant component species.
9. Recognize major plant families represented in the California flora.
10. Demonstrate methods of vegetation classification, plant identification and vegetative survey assessment.

Topics and Scope:

Topics and Scope:

I. Introduction

- A. Scientific inquiry and the scientific method
- B. Influence of this discipline on world civilizations
- C. Plant diversity and classification

II. Plant biology

- A. Basic vegetative morphology of seed plants
- B. Reproductive biology and adaptations of seed plants

- C. Plant ecology: distribution and evolution
- III. California ecology
 - A. California environment: physiography, climate, geology
 - B. Factors influencing plant distribution in California
 - 1. Environmental tolerances
 - 2. Evolutionary history
 - C. Major evolutionary trends in California flora and vegetation
 - D. Development of current vegetation patterns: role of ecological succession
 - E. Major Northern California vegetation types:
 - 1. Coastal grasslands and scrublands
 - 2. Coastal forests
 - 3. Woodlands
 - 4. Chaparral
 - 5. Riparian and wetland types
 - 6. Montane types
- IV. California flora
 - A. Principle families of the California flora
 - B. Identification of dominant species of perennials and wildflowers
 - 1. Sonoma County
 - 2. The North Bay
- V. Major methods of floristic study
 - A. Methods of floristic and vegetational analysis
 - B. Plant identification
 - 1. Herbaria
 - 2. Dichotomous keys
- VI. Laboratory Exercises
 - A. Plant identification
 - B. Plant collection
 - C. Field survey

Assignment:

1. Read text and other assigned reading, approximately 20 pages per week
2. Response papers(2): summaries and analysis of assigned readings, 3-4 pages
3. Prepare plant collection
4. Conduct field survey and analysis
5. Assessment: quizzes (3); midterm and final exam with objective and essay questions

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Response papers

Writing 10 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Field work, Plant collection, field survey and analysis

Skill Demonstrations
30 - 40%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, Completion, Essay

Exams
40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
