COURSE CONTENT

Outcomes and Objectives:

Upon successful completion of this course, students will be able to:

1. Demonstrate the importance of food service sanitation and safety and commit to practice and teach good sanitation and safety principles.
2. Properly use vocabulary relative to microbiology.
3. List various county, state, and federal regulations important to food service operations.
4. Apply the principles of microbiology to every step of food purchase, storage, preparation and re-storage, using Hazard Analysis Critical Control Principles (HACCP).
5. Analyze a food service operation to determine vulnerable aspects in terms of microbial or other contamination.
6. Interpret and apply the concepts of cleaning and sanitizing.
7. Select appropriate vector controls.
8. Examine a workplace in terms of safety and understand the food service workers' responsibilities toward making a safe work environment.
9. Evaluate techniques to motivate and supervise employees to practice good sanitation and safety habits.

Topics and Scope:

Topics will include but not be limited to:

1. Basic principles of micro-organisms including classification, growth requirements, and transmission routes.
2. Description and methods of control of viral, chemical, vector, and parasite-caused food borne illness.
3. Personal sanitation - importance and techniques for mandating good, clean personal habits.
4. Application of sanitation knowledge to food receiving, storage,

preparation, and service, using Hazard Analysis Critical Control Principles (HACCP).

5. Basic concepts of safety in the workplace. Description of common accidents and injuries in food service including prevention and treatment.
6. Knowledge of supervisor's responsibilities in understanding and maintaining sanitation and safety regulations and standards.
7. Practical experience in sanitation and safety training.
8. Supervisor's responsibility in handling and reporting accidents and incidences of food borne illness in the workplace.

Assignment:

1. Participation on a panel of students who investigate a practical problem in food service sanitation or safety and present an oral and written evaluation of the problems.
2. In class sharing of information from library assignment to familiarize the student with material from the Centers for Disease Control and periodical search on safety and sanitation issues.
3. Participation in several role-playing assignments pertaining to supervision of employees.
4. Use of a checklist to evaluate a workplace for safety and sanitation.
5. Use of the Hazard Analysis model to evaluate 5 case studies (HACCP).
6. Short assignments designed to make the California Unicode regulations familiar to the student.
7. In-service presentation.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Field work, Library Research

Problem solving
20 - 35%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances

Skill Demonstrations
5 - 15%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Completion, Short essay, quizzes.

Exams
40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category
5 - 10%
