		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 52.50

Total Student Learning Hours: 78.75

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

Catalog Description:

Construction scheduling types are explored: bar charts, S-curves, logical sequencing, and network diagrams. Introduces the use of computers in documenting Critical Path Method (CPM) in scheduling. The role of the schedule in project management is discussed.

Prerequisites/Corequisites:

Course Completion of CONS 70A (or CONS 70)

Recommended Preparation:**Limits on Enrollment:****Schedule of Classes Information:**

Description: Construction scheduling types are explored: bar charts, S-curves, logical sequencing, and network diagrams. The use of computers in documenting Critical Path Method (CPM) schedules is introduced. The role of the schedule in project management is discussed. (Grade Only)

Prerequisites/Corequisites: Course Completion of CONS 70A (or CONS 70)

Both Certificate and Major Applicable

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course the student will:

1. Identify information needed to schedule a construction project.
2. Determine sequence of individual construction activities.
3. Document typical network pattern for sequence of activities.
4. Interpret bar charts, S-curves, logical sequencing and network diagrams.
5. Develop a project schedule using the Critical Path Method.

Topics and Scope:

- I. Planning for construction
 - A. Activity information needed to construct a schedule
 - B. Time information needed to construct a schedule
- II. Scheduling methods
 - A. Bar charts
 - B. S-curves
 - C. Logical sequencing
 - D. Network diagrams
 - E. Fundamentals of Critical Path Method (CPM) scheduling
- III. Developing a project schedule
 - A. Diagramming alternatives
 - B. Using CPM
- IV. Using schedules for project management
 - A. Interpreting project schedule
 - B. Interpreting summary bar chart
 - C. Interpreting project status report
 - D. Interpreting cost control information

Assignment:

Reading: 20 pages per week
Homework: 3-4 problems per week
Skill demonstration: weekly construction schedule exercises
Quizzes: 2-4
Final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Weekly homework assignments

Problem solving
20 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Weekly construction schedule exercises

Skill Demonstrations
40 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Objective exams, multiple choice, and final exam

Exams
20 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
