### **CID:**

CID Descriptor: AG - AS 108L Beef Cattle Science

SRJC Equivalent Course(s): ANSCI27

### **Certificate/Major Applicable:**

Both Certificate and Major Applicable

## **COURSE CONTENT**

### **Outcomes and Objectives:**

Upon completion of the course, students will be able to:

- A. Discuss the history and development of the beef industry.
- B. Identify beef breeds and their adaptability to climatic conditions and types of operations.
- C. Describe the common systems of beef production.
- D. Explain the principles of genetics in terms of form and function in the beef industry.
- E. Define the relationship between the consumer, packer, and retailer in the commercial beef industry.
- F. Identify common diseases and parasites and the current methods of prevention and treatment.
- G. Explain the principles involved with ruminant nutrition in beef production.
- H. Demonstrate the use of computer management systems to efficiently manage beef cattle operations.
- I. Discuss animal welfare issues, environmental concerns and the beef cattle quality assurance program.
- J. Discuss career opportunities and requirements for successful employment.
- K. Identify cultural influences on the beef industry.

### **Topics and Scope:**

1. The Beef Cattle Industry
  - a. Origin and importance of beef cattle
  - b. Breeds of cattle
  - c. Ethnic contributions
2. Systems of Production
  - a. Purebred enterprise
  - b. Cow/calf operations
  - c. Stocker operations
  - d. Feedlot operations
3. Establishing the Beef Herd
  - a. Selecting the breed and breeding system
  - b. Selecting and foundation stock
    1. Type and conformation
    2. Pedigrees
    3. Performance
4. Beef Cattle Management Practices
  - a. Care and management of the breeding herd
  - b. Beef animal preparation for seed stock sales
  - c. Buildings and equipment
5. Beef Cattle Genetics
  - a. Principles of beef cattle genetics
  - b. Percentage of heritability of beef traits
  - c. Economically important beef traits
6. Beef Cattle Nutrition
  - a. Digestion and utilization of feed
  - b. Nutrient requirements for beef cattle
  - c. Rations for beef cattle
  - d. Range management
7. Herd Health
  - a. Common diseases of cattle
  - b. Control of parasites
  - c. Poisonous plants that affect cattle
8. Marketing Beef Cattle
  - a. Marketing purebred and commercial cattle
  - b. USDA yield and quality grades
  - c. Beef cattle production cycles
9. Issues and Regulations in the Beef Cattle Industry
  - a. Animal/welfare issues
  - b. Quality assurance program
  - c. Environmental issues
  - d. Cultural influences on the industry

### **Assignment:**

Lab Assignments:  
Showing livestock  
Making up rations

Lecture Assignments:  
Read periodicals, handouts, and textbooks (20 pages per week).  
Lab reports (16--one per week).

Term paper ( 6 to 8 pages).  
2 midterms  
Final Exam

### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports, term paper

Writing  
10 - 30%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving  
0 - 0%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, performance exams

Skill Demonstrations  
10 - 30%

**Exams:** All forms of formal testing, other than skill performance exams.

Tests, quizzes, exams

Exams  
30 - 60%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category  
0 - 10%
