Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CULT 250

Catalog Description:

The basic principles of food safety and sanitation and the application of these principles in a food service operation. Includes instruction on sanitation regulations and personal hygiene, contamination sources, microorganisms and conditions for growth, proper food handling techniques and storage, development of a comprehensive cleaning and sanitizing program to prevent foodborne illnesses, and basic concepts of workplace safety. Upon completion students will be prepared to take the ServSafe certification test.

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

- 1. State the potential economic impact and distress caused by food borne illness.
- 2. State the importance of food safety and sanitation as the basis for preventing food borne illness.
- 3. Identify and describe the characteristics of potentially hazardous foods.
- 4. Define the food safety terms: contamination, food borne illness, and outbreak.
- 5. Identify the populations especially at risk of contracting a food borne illness.
- 6. Identify the three classes of food borne illness and discuss how each causes disease.
- 7. Identify the major types of potentially hazardous foods and the risk factors common to these foods.
- 8. Describe methods to prevent biological, physical, and chemical contamination of food.
- 9. Determine when to accept and reject different types of foods based on proper purchasing and recieving procedures.
- 10. Calibrate thermometers and demonstrate correct use.
- 11. Recognize codes and symbols used to designate food products that have been inspected by governmental agencies and coming from approved sources.
- 12. Explain the importance of purchasing and storage management in relation to sanitary food service.
- 13. Describe proper storage of foods to prevent cross contamination and maximize safety.
- 14. Describe time and temperature controls in each step of the flow of food including defrosting, cooking, holding, and serving.
- 15. Demonstrate methods of preventing food-borne illness based on poor personal hygiene and hand contact.

- 16. List the characteristics of materials, designs of facilities, and equipment for sanitary operation.
- 17. Demonstrate principles and proper procedures for sanitizing various materials, equipment, and utensils by both manual and mechanical means.
- 18. Identify ways to prevent pest infestation and methods of pest elimination.
- 19. Describe the roles and activities of the government offices involved in safe food production, distribution, and marketing with respect to controlling food-borne illnesses.
- 20. Apply HACCP (Hazard Analysis Critical Control Point System) in various food handling/service operations.
- 21. Identify common safety hazards.
- 22. Describe how to prevent and treat various accidents that can occur in foodservice and list emergency procedures.
- 23. Maintain high standard of personal cleanliness and hygiene.

Topics and Scope:

- 1. Basic principles of microorganisms
 - a. Classification
 - b. Growth requirements
 - c. Transmission routes
- 2. Description and methods of controlling food borne illnesses
 - a. Viral-caused
 - b. Chemical-caused
 - c. Parasitic-caused
 - d. Bacteria-caused
- 3. Personal sanitation importance and techniques
 - a. Maintaining high standard of personal cleanliness and hygiene
 - b. Mandating high standards of personal cleanliness and hygiene
- 4. Application of sanitation knowledge (HACCP)
 - a. Food receiving
 - b. Food storage
 - c. Food preparation and service
- 5. Basic concepts of workplace safety
 - a. Description of common accidents in food service
 - b. Prevention and treatment
- 6. Responsibility for understanding and maintaining regulations and standards
 - a. Sanitation
 - b. Safety

Assignment:

- 1. Readings from assigned textbook and student handbook of approximately 20 pages per week.
- 2. Short written reports on an assigned microorganism; foodborne illness; other food safety issues.
- 3. View videos on appropriate sanitation techniques, foodborne illness, safe receiving and storage, etc.
- 4. Visit a variety of Web sites and complete associated assignments.
- 5. Inspect a food service site using a checklist to evaluate for safety and sanitation.
- 6. Utilize the Hazard Analysis (HACCP) model to evaluate case studies.
- 7. Answer weekly discussion questions.
- 8. Weekly quizzes and final exam.
- 9. Properly calibrate thermometers.

10. Properly set-up a three-compartment sink.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework & reports

Writing 5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, field work, online and/or library research

Problem solving 20 - 35%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, performance exams: thermometer calibration, etc.

Skill Demonstrations 5 - 15%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and Final Exam; Multiple choice, true/false, matching items, completion, short essay

Exams 40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation.

Other Category 5 - 10%

Representative Textbooks and Materials:

ServSafe Coursebook, Applied Food Service Sanitation, 5th ed., Nifi, 2008.

Instructor prepared course materials, student handbook and handouts.

Library/online reading assigned in F.D.A. Consumer Magazine and Center for Disease Control handouts and sites.
