		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CIS 19B

Catalog Description:

This is the second semester course in C# programming for the CIS 19A graduate or the person who has prior programming experience but has not worked with C#. Students will prepare reasonably complex programs and work with object oriented programming and features of the .Net framework class libraries. This course is taught using the current version of Visual C# from Microsoft

Prerequisites/Corequisites:

Completion of CIS 19A or CIS 16A or CIS 10 or CS 10

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:**Schedule of Classes Information:**

Description: This course is the second semester in C# for CIS 19A graduates or those who have prior programming experience but have not worked with C#. Students will prepare reasonably complex programs and work with object oriented programming and features of the .Net framework class libraries. (Grade Only)

Prerequisites/Corequisites: Completion of CIS 19A or CIS 16A or CIS 10 or CS 10

Recommended: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Transfer Credit: CSU;UC.

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

1. Summarize the beginning concepts and instructions of the C# programming language.
2. Demonstrate understanding of event-driven programming and graphical user interface design.
3. Design, write, test, debug and document reasonably complex computer programs in C# using object oriented programming techniques to solve a variety of advanced problems.
4. Create, access and maintain accurate data files (text and relational database) through a C# program interface.
5. Develop programs incorporating computer graphics elements.

Topics and Scope:

1. Review and Overview
 - a. Review of the C# programming environment, language rules and structure.
 - b. Review of forms and simple C# controls and their properties and methods
 - c. Concepts of event-driven programming
 - d. User interface design
2. Advanced Use of the C# Integrated Development Environment
 - a. Advanced environment options
 - b. Advanced debugging tools and techniques
3. Object Oriented Design Techniques
 - a. What is an object?
 - b. Modeling real world interaction
 - c. Unified modeling language

4. Object Oriented Programming
 - a. Classes and structures
 - b. Properties and methods
 - c. Interface programming
 - d. Inheritance, polymorphism
 - e. Information hiding and encapsulation
5. Exploring the .Net framework
 - a. Built-in controls
 - b. Built-in data types
 - c. The common language runtime
 - d. Advanced string manipulation
6. Error handling
 - a. Exception handling
 - b. User defined exceptions
7. Relational Database Programming
 - a. Microsoft SQL server
 - b. Introduction to database file concepts and operations
 - c. Data controls, data-bound controls and grid controls
8. Web programming
 - a. Creating a C# website
 - b. Microsoft internet information server
 - c. Web services

Assignment:

1. Read 30-50 pages from the textbook each week.
2. Write reasonably complex computer programs using the C# programming language using proper structure and style.
3. Test, detect and fix errors in computer programs.
4. Formulate accurate and descriptive program documentation.
5. Complete a team programming project.
6. Take objective examinations.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written program documentation

Writing 10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, programming assignments
--

Problem solving 30 - 60%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, true/false, matching items, completion, design and code programming exercises.

Exams
20 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

Team programming project

Other Category
10 - 20%
