Catalog Description:
This course introduces the student to the role of accounting in processing and reporting the effects of economic transactions. It examines financial accounting from both the user and preparer perspectives. It teaches how information is processed and reported by the accounting information system as well as how the reports are used by investors and creditors in making decisions. The economic transactions are also analyzed by type of business activity: operating, investing, or financing and their impact on cash flows and profitability for both service and merchandising concerns. The ability to perform basic spreadsheet functions is highly recommended. The course objectives comply with the California Core Competency Model developed by the California Society of Certified Public Accountants' Committee on Accounting Education. This course will prepare the transfer degree and/or certificate student for business or accounting programs.

Prerequisites/Corequisites:

Recommended Preparation:
Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course students will be able to:

1. Explain how accounting meets the information needs of investors, creditors, managers, regulatory agencies, and taxing authorities.
2. Explain the principles, procedures, and concepts underlying the primary financial statements.
3. Evaluate the uses and limitations of financial statements and related information disclosed in the annual report of Securities and Exchange Commission's reports in making decisions.
4. Explain how an accounting system is designed to meet the needs of specific businesses; and how to input transactions, process this input and prepare and interpret the financial statements.
5. Determine the economic transactions for both a service and merchandising concern from the source document through the closing process.
6. Analyze the difference in accounting methods allowed under generally accepted accounting

principles in the accounting for various assets, liabilities and equity transactions.

7. Categorize the types of business transactions as being operating, investing or financing activities.
8. Compare the difference between accrual based measurements and cash flows from activities.
9. Demonstrate analytical, interpersonal, and communication skills in solving problems.

Topics and Scope:

 - C. Common-size statements
 - D. Ratio analysis:
 1. Liquidity analysis
 2. Solvency analysis
 3. Projectability Analysis
 - E. Limitations of Financial Statements and Analysis

Assignment:

1. Reading of text and other written material (20 to 30 pages per week)
2. Written homework involving problem solving and calculational skills
3. Group case research, report, analysis, and presentation
4. 3 to 5 Performance exams, mid-term(s) and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, essay exams, group case reports

Writing
25 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems and group case problems

Problem solving
20 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams, group case assignments

Skill Demonstrations
20 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, true/false, matching items, completion, short answer

Exams
10 - 30%

Other: Includes any assessment tools that do not logically fit into the above categories.

Group participation and oral presentation grades

Other Category
5 - 10%
