## **COURSE CONTENT**

### **Outcomes and Objectives:**

The student will:

- 1) Recognize and understand basic terms and concepts of livestock behavior, including the history and science of ethology.
- 2) Identify and understand the basic processes that shape livestock behavior.
- 3) Assess the relevance of livestock behavior to humane handling.
- 4) Apply critical thinking and problem-solving skills to develop humane livestock handling systems and facilities.
- 5) Acquire the technical skills necessary for humane handling of cattle, sheep, goats, swine and horses in a field setting.

### **Topics and Scope:**

- 1) History of ethology
  - a) Domestication
  - b) Ethics
- 2) Benefits of humane handling
  - a) Working conditions
  - b) Animal Product quality
  - c) Quality of Life
- 3) Animal Perception
  - a) Genetics influences
  - b) Learned behavior
    - i) Critical periods
    - ii) Learning and training
  - c) Stress

- i) Perceptions
- ii) Sensations
- 4) Handling Livestock
  - a) Predator Prey Patterns
  - b) Handling practices that use animal instinct
- i) Gathering
- ii) Movement
- iii) Crowding
- iv) Sorting
- v) Transportation
- vi) Processing
- 5) Species Specific Handling Facilities
  - a) Cattle Handling
    - i) Design
      - (1) Location and layout
        - (a) Curved systems
        - (b) Solid siding
        - (c) Corrals
        - (d) Footing
      - ii) Restraint practices
    - b) Swine Handling
      - i) Design
        - (1) Location and layout
          - (a) Curved systems
          - (b) Solid siding
          - (c) Pens
          - (d) Footing
        - ii) Restraint practices
      - c) Sheep Handling
        - i) Design
          - (1) Location and layout
            - (a) Curved systems
            - (b) Solid siding
            - (c) Corrals
            - (d) Footing
          - (2) Restraint practices
        - d) Goat Handling
          - i) Design
            - (1) Location and layout
              - (a) Curved systems
              - (b) Solid siding
              - (c) Corrals
              - (d) Footing
            - (2) Restraint practices
        - e) Horse Handling
          - i) Design
            - (1) Location and layout
            - (2) Restraint practices

### **Assignment:**

1. Read periodicals, handouts, and texts (20 to 30 pages per week)

2. Facilities design
3. Quizzes, tests, mid-term and final exam
4. Practical skills exam

### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing  
0 - 0%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Facilities design

Problem solving  
10 - 10%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Practical skill demonstrations

Skill Demonstrations  
40 - 55%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

Exams  
35 - 50%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

None

Other Category  
0 - 0%

### Representative Textbooks and Materials:

Humane Livestock Handling: Understanding livestock behavior and building facilities for healthier animals. By Temple Grandin Publisher Storey Publishing (2008).

The following texts are classics in the field:

Social Behavior in Farm Animals By Linda J. Keeling, Harold W. Gonyou. Publisher CABI (2001)

The Ethology of Domestic Animals: an introductory text. By Per Jensen Publisher CABI (2002)

Animal Domestication and Behavior By Edward O. Price CABI (2002)

Principles of Animal Behavior By Lee Alan Dugatkin 1st edition, 2004
