### PHYSIO 58 Course Outline as of Spring 2011

#### **CATALOG INFORMATION**

Dept and Nbr: PHYSIO 58 Title: INTRO HUMAN PHYSIO

Full Title: Introduction to Human Physiology

Last Reviewed: 1/27/2020

Units		Course Hours per Week		Nbr of Weeks	<b>Course Hours Total</b>	
Maximum	3.00	Lecture Scheduled	2.00	17.5	Lecture Scheduled	35.00
Minimum	3.00	Lab Scheduled	3.00	6	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

### **Catalog Description:**

This is an introductory course in human physiology, organized around body systems and the theme of homeostasis. The course is designed for the beginning student preparing for these health-related fields: vocational nursing, radiologic technology, massage; or those with a general interest in the function of the human body. This course will minimize bio-chemical and quantitative details taught in a general physiology course (e.g., PHYSIO 1), focusing on the fundamental concepts of physiology. (Not intended for nursing (RN), dental hygiene, or physical therapy majors.)

# **Prerequisites/Corequisites:**

### **Recommended Preparation:**

Completion of Chem 60. Eligibility for Engl 1A.

#### **Limits on Enrollment:**

# **Certificate/Major Applicable:**

Both Certificate and Major Applicable

# **COURSE CONTENT**

# **Outcomes and Objectives:**

Upon completion of this course, students will be able to:

- 1. Define homeostasis and explain how feedback mechanisms function to maintain homeostasis.
- 2. Describe the function of the organ systems of the body, including the nervous, endocrine, muscular, circulatory, respiratory, digestive, urinary, immune, reproductive systems.
- 3. Identify the roles of the nervous and endocrine systems in regulation of other organ systems.
- 4. Compare and contrast the basic mechanisms by which organ systems of the body maintain homeostasis.
- 5. Explain how the structure of cells supports the function of organ systems.
- 6. Conduct simple physiological experiments using standard laboratory equipment.

# **Topics and Scope:**

- 1. Introductory concepts
  - a. scientific method
  - b. levels of biological organization

- c. homeostasis
- 2. Cell structure and function
  - a. macromolecules
  - b. organelles
  - c. cell membranes
  - d. ATP (adenosine triphosphate) and enzymes
- 3. Control systems: nervous and endocrine
  - a. neurons, membrane potentials, synapses
- b. structure and function of CNS (central nervous system), PNS (peripheral nervous system), ANS (autonomic nervous system)
  - c. sensory receptors, transduction
  - d. endocrine glands, hormones
- 4. Muscle system
  - a. skeletal, cardiac, smooth muscle
  - b. muscle contraction
- 5. Circulatory system
  - a. basic plan of circulation
  - b. cardiac cycle
  - c. blood vessels and blood pressure
  - d. regulation of cardiac output, blood pressure
  - e. basis for heart attack, hypertension, atherosclerosis
- 6. Respiratory system
  - a. ventilation
  - b. gas exchange
  - c. regulation of respiratory rate
  - d. description of chronic obstructive pulmonary disease
- 7. Urinary system
  - a. formation of urine
  - b. regulation of salt and water balance
  - c. regulation of acid base balance
- 8. Digestive system
  - a. organs and enzymes of digestion
  - b. factors that affect absorption
- 9. Immune system
  - a. injury and infection
  - b. organs, cells and molecules that provide immune defense
- 10. Reproductive system
  - a. organs and hormones involved in sperm production
  - b. organs and hormones of menstrual cycle, pregnancy, parturition,

#### lactation

- 11. Laboratory exercises
  - a. homeostasis
  - b. blood chemistry
  - c. enzyme activity
  - d. reflex arc
  - f. senses
  - g. muscle contraction
  - h. cardiac function
  - i. pulmonary function
  - i. renal function
  - k. acid base balance
  - 1. glucose tolerance test

#### **Assignment:**

- 1. Read an average of 25-40 pages of text per week
- 2. Perform weekly laboratory experiments with data collection
- 3. Written laboratory reports, 12-16
- 4. Written homework assignments, 0-6
- 5. Examinations: weekly quizzes, 3 combined lecture and lab exams, a cumulative final exam

#### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports, homework assignments

Writing 20 - 50%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion, Essay

Exams 30 - 80%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Class attendance and participation

Other Category 0 - 20%

# **Representative Textbooks and Materials:**

Essentials of Human Anatomy and Physiology, 9th edition, Elaine Marieb, 2008, Benjamin Cummings

Understanding Human Anatomy and Physiology, 6th edition, SN Longenbaker, 2008, McGraw Hill
