COURSE CONTENT

Outcomes and Objectives:

Students will:

1. Develop a task specific understanding of organic grape growing.
2. Identify a wide variety of key elements, sub-elements, their relationships and implications in the processes of organic grape growing.
3. Diagram these elements, sub-elements, etc. in a "knowledge mapping" format for future use and reference.
4. Describe in detail a variety of organic grape growing methods, their purposes, strengths, weaknesses and appropriate applications.
5. Demonstrate a familiarity with organic grape growers in Sonoma County.
6. Create a "course book" as a reference guide, including all materials presented, their own notes, observations, etc. and a host of handouts, readouts and printouts on the specifics of organic viticulture.
7. Recommend specific organic grape growing techniques for their own professional situations or that of a friend, relative, professional acquaintance, etc.

Topics and Scope:

1. Identification and analysis of the Organic Grape growing industry.
2. Overview of the Organic Grape growing industry worldwide, in the United States, in California, and specifically Sonoma County.
3. Survey of a variety of Organic Grape methods, their strengths, weaknesses and appropriate applications.
4. Visitation of a variety of Sonoma County grape growers.

Assignment:
