COURSE CONTENT

Outcomes and Objectives:

The students will:

1. Describe the role and function of the psychiatric technician as well as the role and function of other members of the treatment team.
2. Describe identified standards for health care professionals.
3. State the legal rights of patients and the criteria for the various involuntary commitment procedures.
4. Describe the elements of communication and the communication techniques that will develop and maintain a therapeutic relationship with patients.
5. State the major, significant elements that distinguish a mentally healthy person from a mentally ill person.
6. Recognize and describe the dynamics and behavioral manifestations of patients with psychiatric disorders.
7. Describe principles of observation in any patient contact, through consideration of what is seen and heard to identify emotional, physical, spiritual, intellectual and psychosocial needs of the patient.
8. Describe guidelines and principals of documentation in reference to behavioral charting.
9. Develop written treatment plans, utilizing appropriate assessment criteria and measurable behavioral objectives.
10. Describe elements necessary to maintain a therapeutic ward milieu.
11. Describe various psychiatric and rehabilitative treatment modalities.
12. Describe the characteristics, therapeutic and adverse effects of the commonly used psychotropic medications.
13. Develop an awareness of self which will enable the student to

- recognize stressors affecting their personal and professional life and demonstrate an ability to utilize coping skills effectively.
14. Recognize the importance of further professional and self growth.

Topics and Scope:

1. Professional ethics, legal issues, commitment procedures.
2. Overview of mental health and of psychiatry.
3. Communication theory, interpersonal and therapeutic communication.
4. The therapeutic relationship, nursing process and documentation.
5. Developing psychiatric nursing care plans.
6. Mental status assessment, observation, reporting and recording.
7. Psychopharmacology, psychotropic medications.
8. Psychiatric disorders.
9. Treatment modalities.

Assignment:

1. Reading assignments in preparation for each lecture from required texts and library. 40-50 pages per week.
2. Required viewing of films and audio-visual media related to specific content, approximately one per week, completion of study questions on each film.
3. Required reading of supplemental book and reaction paper on that book.

Methods of Evaluation/Basis of Grade:
