COURSE CONTENT

Student Learning Outcomes:

Upon completion of the course, students will be able to:

1. Explain the centrality of empirical research to the sociological enterprise.
2. Describe, compare, and contrast commonly used research paradigms and methods.
3. Design, conduct, and report results from a research project.
4. Summarize and critically evaluate results from published research studies.

Objectives:

Upon completion of this course, students will be able to:

1. Explain why research is important within the field of sociology.
2. Identify the steps in sociological investigation.
3. Compare and contrast scientific, interpretive, and critical frameworks for conducting sociological research.
4. Describe the key elements of sociological research methods, including ethnography, surveys, interviews, and content analysis.
5. Develop a viable research question.
6. Summarize existing research literature.
7. Select and apply an appropriate methodology for a given research question.
8. Analyze and report on collected data.
9. Evaluate the quality of research findings reported in popular media and scholarly reports.

Topics and Scope:

- I. Importance and uses of research
 - A. Empirical knowledge vs. "common sense"
 - B. Basic research models (exploratory, descriptive, explanatory, evaluative)
- II. Research ethics
 - A. Common dilemmas
 - B. Principles of research ethics

- III. Preparing to conduct sociological research
 - A. Forming a researchable question or hypothesis
 - B. Reviewing the literature
 - C. Preparing a research proposal
- IV. Conducting sociological research
 - A. Gathering data
 - B. Analyzing collected data
 - C. Presenting collected data in narrative and/or graphic form
- V. Proposing and evaluating research reports
 - A. Understanding statistical tables and graphs
 - B. Evaluating how a study was conducted
 - C. Assessing research findings and conclusions

Assignment:

1. Read 20-30 pages per week.
2. Take 2-3 exams, including a Final Exam, on material from lectures and reading.
3. Complete a research paper of 10-15 pages, focused on individual research or the research process.
4. Short writing assignments, including analyses of methods of social research for a total of 6-8 pages.
5. At the discretion of the instructor, provide group presentations and participate in in-class and out-of-class exercises

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research project and essay; short writing assignments regarding research methods

Writing
50 - 60%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Essay questions and multiple-choice, short answer, or true false questions either as take-home or in-class tests

Exams
40 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Student Presentations

Other Category
0 - 10%
