Catalog Description:

Introductory course to develop skills necessary for completion of Introduction to Principles of Biology. Course is designed for students who have not developed the skills necessary for successful completion of college transfer science courses. Class will apply basic study skills to the understanding of biological elements in living systems, from atoms to the ecosystem level. A specific focus topic such as water will be used to relate learning skills to specific biological information

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ENGL 102 or ESL 100

Limits on Enrollment:

Schedule of Classes Information:

Description: Introductory course to develop skills necessary for completion of Introduction to Principles of Biology. Class will apply basic study skills to the understanding of biological elements in living systems, from atoms to the ecosystem level. (Grade or P/NP)

COURSE CONTENT

Outcomes and Objectives:

Upon successful completion of this course the student will be able to:

- 1. Take effective notes and keep an organized notebook.
- 2. Apply concepts learned in biology to laboratory style observations and experiments.
- 3. Apply the methods of science to formulating and testing hypotheses.

4. Describe examples of the levels of biological organization from the atomic to the ecosystem scale.

5. Explain selected processes that govern the functioning of biological systems in cells, organisms, populations, and communities.

6. Apply general ideas about biological systems to one specific focus topic such as water.

7. Apply active learning techniques.

Topics and Scope:

- I. Learning to Learn
 - A. Active learning skills
 - B. Biology in a lecture setting
 - C. Preparing for exams
 - D. Organizational skills
- II. The Methods of Science
 - A. Observation
 - B. Hypotheses
 - C. Deductive reasoning
- III. Introduction to Molecules
 - A. Atomic structure
 - B. Chemical bonding
 - C. Macromolecules: carbohydrates, lipids, proteins, and nucleic acids

- IV. Cells
 - A. Structure
 - B. Membranes
 - C. Transport
- V. Organisms
- A. Plants
- B. Animals
- C. Microorganisms
- VI. Human Populations
 - A. Population growth
- B. Effects on other biological organisms
- VII. Community Interactions
 - A. Trophic levels: producers, consumers, decomposers
 - B. Food chains and food webs
- VIII. Ecosystems
 - A. Energy transformations
 - B. Nutrient Cycles
 - C. Role of microorganisms in ecosystem processes
 - D. Local and regional ecosystem processes

Assignment:

1. Assigned course reading will total approximately 150 pages from texts, news articles, and handouts.

2. Assigned homework- completion of graphs, worksheets and study guides (50 pages per semester).

- 3. Classroom exercises to promote active learning and study skills.
- 4. Written homework, news article summaries, short essays.
- 5. One midterm, one final, and 8-9 quizzes.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, news article summaries, short essays

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework assignments, graphing data

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Writing 10 - 30%

Problem solving 5 - 20%

Skill Demonstrations

0 - 0%

None

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, mid-term and final exam. Multiple choice, matching items, completion (short answer/essays).

Other: Includes any assessment tools that do not logically fit into the above categories.

Classroom participation and attendance

Representative Textbooks and Materials:

Instructor prepared materials

Exams 40 - 60%

Other Category 10 - 25%
