Formerly: AG 297.63

Catalog Description:
Season-long production practices required for successful Sonoma County warm season vegetable crops: tomatoes, peppers, eggplant, melons, and others. Topics include strategies for starting and maintaining crops, innovative irrigation methods, essential weed and pest control measures, and marketing. Focus will be on organic systems but material will be useful to all growers. This is an intermediate level course designed for those who have taken Specialty Crop Production or Organic Garden Crop Production, or with prior production experience with vegetable crops.

Prerequisites/Corequisites:

Recommended Preparation:

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

1. Identify varieties of warm season vegetables suitable for Sonoma County soils and microclimates.
2. Describe soil preparation and fertility management methods for warm season vegetables.
3. Demonstrate proper technique for seed planting in flats or direct seed seeding in ground.
4. Diagram a planting layout for warm season vegetables within the student's own available garden space.
5. Create a planning calendar of cultural practices from soil preparation through harvest for a selected warm season crop.
6. Identify common pests, diseases and weeds of warm season crops.
7. Recommend control measures for pests, diseases and weeds.
8. Create a marketing plan and identify marketing strategies.

Topics and Scope:

1. Identification and production of warm season vegetable varieties specifically suited to Sonoma County conditions and markets.
2. Soil conditions, fertility and amendments.
3. Seed planting in flats or direct in ground.
4. Quantities and spacing of varieties for desired yields.
5. Cultural practices through the season; thinning, training/staking, weed

- and insect control, irrigation, fertilization.
6. Harvest methods.
 7. Marketing: marketing plan, market outlets, value-added products, packaging, shipping, and display.

Assignment:

Representative assignments:

1. Reading: approximately 10-20 pages per week.
2. Planting layout for a given planting space.
3. Planning calendar of cultural practices for selected crop.
4. Paper (2-4 pages) identifying and recommending control measures for pests, diseases, and weeds common to warm season crops.
5. Crop budget.
6. Outline a marketing plan (2-3 pages).
7. Skill demonstrations on site (lab): seed planting; application of cultural practices; pest and weed identification.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Essay exams

Writing
10 - 50%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Quizzes

Problem solving
10 - 50%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances

Skill Demonstrations
20 - 60%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items

Exams
20 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
