COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course students will be able to:

1. Plan an independent study project in an Earth Science or Astronomy related discipline.
2. Conduct the study by means of literature research, field work, or laboratory work.
3. Present the results of the study in a written and/or oral format.

Topics and Scope:

Content will vary with the student, but will build upon the department's regular offerings and capitalize on the student's special interests or abilities.

Assignment:

Will be arranged by agreement between the student and instructor.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Literature reports, term papers

Writing 1 - 100%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None	Problem solving 0 - 0%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.	
None	Skill Demonstrations 0 - 0%
Exams: All forms of formal testing, other than skill performance exams.	
None	Exams 0 - 0%
Other: Includes any assessment tools that do not logically fit into the above categories.	
Oral presentation of research results.	Other Category 0 - 99%

Representative Textbooks and Materials:
 Texts will vary with content.
