COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Describe the current status of CSS implementation across the various browsers.
2. Deconstruct an existing web page into valid XHTML and CSS documents.
3. Use the CSS component from the process of deconstructing and apply it to an existing web page.
4. Create original web pages which are styled completely by means of CSS.
5. Produce validated XHTML and CSS documents.
6. Successfully prepare electronic documents and upload them to the World Wide Web.
7. Use at least six types of selectors in CSS documents.
8. Describe the various values and units used in the current CSS version.
9. Manage web page text effectively by means of CSS.
10. Demonstrate appropriate use of:
 - a. Inline and block elements
 - b. The basic element box
 - c. Floating and positioning
 - d. Table formatting
 - e. Lists and generated content
 - f. Class, ID selectors and HTML tags
11. Repeating students will utilize advanced features and the latest technologies.

Topics and Scope:

I. Overview

- A. History of the World Wide Web
- B. Need for CSS
- C. Current status of CSS implementation
- D. Possible future scenarios
- E. Beyond HTML

II. Selectors

- A. Basic rules
- B. Grouping
- C. Class and ID selectors
- D. Attribute selectors
- E. Document structure
- F. Pseudo-classes and pseudo-elements
- III. Structure and the cascade
 - A. Specificity
 - B. Inheritance
 - C. The cascade
- IV. Values and units
 - A. Numbers
 - B. Percentages
 - C. Color
 - D. Length units
 - E. URLs
 - F. CSS2 units
- V. Fonts
 - A. Family
 - B. Weight
 - C. Size
 - D. Style and variant
 - E. Stretching and adjusting
 - F. Font property
 - G. Font matching
- VI. Text
 - A. Indentation and alignment
 - B. Vertical alignment
 - C. Word and letter spacing
 - D. Text transformation
 - E. Text decoration
 - F. Text shadows
- VII. Basic visual formatting
 - A. Basic boxes
 - B. Block level elements
 - C. Inline elements
 - D. Altering element display
- VIII. Padding, borders, and margins
 - A. Basic element boxes
 - B. Margins
 - C. Borders
 - D. Padding
- IX. Colors and backgrounds
 - A. Colors
 - B. Foreground colors
 - C. Backgrounds
- X. Floating and positioning
 - A. Floating
 - B. Positioning
- XI. Table layout
 - A. Table formatting
 - B. Table cell borders

- C. Table sizing
- XII. Lists and generated content
 - A. Lists
 - B. Generated content
- XIII. User interface styles
 - A. System fonts and colors
 - B. Cursors
 - C. Outlines
- XIV. Non-Screen media
 - A. Designing Medium-Specific Style Sheets
 - B. Paged media
 - C. Aural styles
- XV. Repeating students will be exposed to more difficult techniques utilizing advanced features and latest technology.

Assignment:

1. Read approximately 30 pages per week from the textbook.
2. Take between two and five quizzes and exams.
3. Deconstruct existing web pages into XHTML and CSS components.
4. Create original web pages that contain all style components in external or embedded CSS.
5. Develop CSS to transform plain HTML into a given look.
6. Use CSS and XHTML validators to test validity of all class work prior to submission for grading.
7. Complete web page report on current and projected status of implementation of CSS by various browsers.
8. Students repeating this class will be given projects of increasing difficulty and will explore, evaluate, and implement the rules and styles of the latest version of CSS.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Web pages, report

Problem solving
60 - 80%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Exams: multiple choice, true false

Exams
20 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
