COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Explain the physiology of callus formation for grafting/budding success.
- 2. Describe various budding and grafting methods, including a recommendation for each as to the appropriateness of choice and the proper timing.
- 3. Demonstrate effective chip budding techniques.
- 4. Recognize scion-rootstock incompatability and take appropriate action.

Objectives:

Upon completion of this course, students will be able to:

- 1. Differentiate between sexual and asexual propagation.
- 2. Compare and contrast various grapevine propagation methods.
- 3. Discuss the purpose of budding and grafting for vineyard production.
- 4. Describe various budding and grafting methods used to graft over rootstocks or existing vineyards and discuss the advantages and disadvantages of each.
- 5. Describe the physiology and morphology of internal and external budwood structures
- 6. Determine compatibility of vine and rootstock to avoid grafting failure.
- 7. Store and sanitize budwood.
- 8. Properly prepare rootstocks and vines for budding and grafting.
- 9. Practice appropriate post grafting plant care.

Topics and Scope:

- I. Grapevine Propagation
- A. Sexual
- B. Asexual
- II. Overview of Grapevine Propagation Methods
- III. Purpose of Budding and Grafting
- IV. Budding and Grafting Methods

- A. Field budding B. "T" budding C. Grafting
- D. Bench grafting
- E. Advantages and disadvantages of each method
- V. Budwood
- A. Physiology and morphology of budwood
 - 1. External structure
 - 2. Internal structure
- B. Collection
- C. Sanitation
- D. Storage
- E. Certified budwood vs. field selections
- VI. Incompatibility Concerns
- A. Genetic
- B. Virus diseases
- C. Fungal diseases
- VII. Preparation for Grafting and Budding
- A. Timeliness
- B. Irrigation
- C. Fertilization
- VIII. Post Grafting Care
- A. Irrigation
- B. Fertilization
- C. New shoots training
- IX. Demonstration in the Vineyard

Assignment:

- 1. Compile field notes from vineyard demonstrations.
- 2. Reading: 10-25 pages.
- 3. Final exam.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Field notes.

Writing 30 - 40%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or noncomputational problem solving skills.

None

Problem solving

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion, Short answer.

Exams 60 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation in class activities.

Other Category 0 - 10%

Representative Textbooks and Materials:

Grafting and Budding- A Practical Guide for Fruit and Not Plants, W.J. Lewis and D. Alexander, Landlinks Press, second ed., 2009 Instructor prepared materials.
