

CSKLS 372 Course Outline as of Fall 2014**CATALOG INFORMATION**

Dept and Nbr: CSKLS 372 Title: PRE-ALGEBRA

Full Title: Pre-Algebra

Last Reviewed: 1/25/2021

Units		Course Hours per Week		Nbr of Weeks	Course Hours Total	
Maximum	3.50	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	3.50	Lab Scheduled	2.00	6	Lab Scheduled	35.00
		Contact DHR	0		Contact DHR	0
		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00

Total Student Learning Hours: 192.50

Title 5 Category: AA Degree Non-Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CSKL 372

Catalog Description:

This course covers operations with signed numbers, rules of powers and square roots applied to real numbers, using simplified, evaluated and scientific notation; geometric formulas to solve perimeters, areas, and volumes of figures; and algebraic expressions and linear equations. Emphasis is placed on critical thinking and demonstrating strategies as well as finding solutions. Regularly scheduled computer-assisted lab assignments reinforce or supplement lecture topics.

Prerequisites/Corequisites:

Course Completion of CSKLS 371 or CSKLS 368B or higher (V1); OR Qualifying score on Math placement test

Recommended Preparation:**Limits on Enrollment:****Schedule of Classes Information:**

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

1. Use advanced computation skills in addition, subtraction, multiplication, and division with real numbers.
2. Solve complex word problems involving multiple operations.
3. Solve pre-algebra problems including simple linear equations with real numbers.
4. Use formulas to solve problems with common geometric shapes (perimeter, circumference, area and volume).
5. Use a scientific calculator for multiple operations, including square roots and scientific notation.
6. Identify support services for math offered in College Skills labs, Tutorial Center, and instructor's student consultation hours.
7. Apply study and test-taking techniques to course material and other college courses.

Topics and Scope:

- I. Advanced arithmetic skills development without a calculator
 - A. The four basic operations (addition, subtraction, multiplication and division) of positive whole numbers, fractions and decimals
 - B. Order of operations (grouping symbols, exponents, multiplication and division, addition and subtraction)
 - C. Conversions and comparisons of fractions, decimals, percents
 - D. Translating words and phrases to set up and solve math expressions with positive numbers

II. Rational numbers

- A. Introduction to the number line, integers, rationals, absolute value, and inequalities
- B. Advanced skill development of the four basic operations as applied to the rational numbers without a calculator
- C. Order of operations
- D. Translating words and phrases to set up and solve math expressions with rational numbers

III. Exponents

- A. Rules of exponents: zero exponent, product rule, quotient rule, negative exponents, power rule
- B. Use of scientific calculator
- C. Scientific notation
- D. Square roots
 - 1. Rational and irrational solutions
 - 2. Application of the Pythagorean Theorem
- E. Word problems involving exponents (exponential growth and decay)

IV. Geometry

- A. Application of formulas to solve perimeter and area problems
 - 1. Four basic shapes (rectangle, square, triangle, and circle)
 - 2. Trapezoid and parallelogram
 - 3. Composite figures made from these shapes
- B. Application of formulas to solve volume problems
 - 1. Prisms, cubes, cylinders, cones, pyramids, rectangular solids, spheres
 - 2. Composite figures made from these shapes
- C. Solving word problems involving perimeter, area, and volume

V. Algebra expressions and equations

- A. Introduction to algebraic vocabulary: variable, constant, term, coefficient, degree, expression, equation, polynomials
- B. Simplifying and evaluating algebraic expressions
- C. Solving linear equations
 - 1. Single-step equations (addition/subtraction or multiplication/division)
 - 2. Multi-step equations (addition/subtraction and multiplication/division)
 - 3. Equations with variables on both sides
 - 4. Equations with fractions, decimals, and percents

VI. Lab work

Assignment:

- 1. 25 - 35 homework assignments
- 2. 28-34 quizzes
- 3. 4 - 6 unit tests
- 4. Computer lab and/or online assignments (30 - 60 problems per week)
- 5. Comprehensive final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, lab assignments

Problem solving
20 - 40%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Lab quizzes, unit tests, final exam

Exams
50 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

Lecture and lab participation

Other Category
0 - 10%
