Catalog Description:

Demonstration and supervised practice of intermediate vocational nursing: adult/geriatric, maternal-child, pediatric skills based on scientific principles and concepts from theory. Concepts related to mental health and growth and development will be integrated into skills. Planning and implementing intermediate adult/geriatric, maternal-child, and pediatric patient care are done in the simulated clinical setting relevant to steps in the nursing process: assessment, planning, implementing, evaluation and documentation. Students will practice and demonstrate skills in the lab setting prior to the assignment of these skills in the clinical setting.

Prerequisites/Corequisites:

Course Completion of NRV 51 and NRV 58A and NRV 51L and Concurrent Enrollment in NRV 52.1 and NRV 52.2 and NRV 52.2L and NRV 52.1L

Recommended Preparation:**Limits on Enrollment:****Schedule of Classes Information:**

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Incorporate the theoretical principles from intermediate med-surg and maternal-child nursing courses: NRV 51, NRV 5

2. 1 and NRV 52 to demonstrate the planning and implementation of intermediate skills for adult/gerontological, pediatric and maternal-child clients.

Apply infection control principles and standard precautions to the implementation of intermediate nursing skills for the adult, gerontological, pediatric, and maternal-child client.

3. Demonstrate psychomotor competency of select intermediate and more complex nursing skills, including that of mental health, for the adult/gerontological, pediatric and maternal child client.

Objectives:

Upon completion of this course, students will be able to:

1. Incorporate theoretical principles from the fundamentals/basic medical surgical skills course into the planning and implementation of intermediate nursing skills for adult, maternal-child, and pediatric patients.

2. Use anatomical landmarks to perform physical assessments and implement therapeutic

procedures for adult, maternal-child, and pediatric patients.

3. Demonstrate psychomotor competency in the performance of selected intermediate skills.
4. Communicate therapeutically with adult, maternal-child and pediatric patients including those with mental health issues.
5. Teach fundamental self-care skills to patients and parents of pediatric patients.
6. Plan and implement preoperative and postoperative care.
7. Evaluate effectiveness of nursing interventions on adult, maternal-child, and pediatric patients.
8. Work cooperatively as a team member to ensure that all members achieve learning objectives.
9. Adapt procedures to meet patients' needs.

Topics and Scope:

1. Team learning strategies for intermediate vocational nursing skills for adult/gerontologic, maternal child and pediatric patients, including mental health
2. Review and apply principles from the prerequisite courses to adult, maternal child, pediatric skills:
 - a. Infection control
 - b. Sterile technique
 - c. Therapeutic communication
 - d. Assaultive behavior management
 - e. Health care teaching to patients and family
3. Use of anatomical landmarks:
 - a. Adults vs. children
 - b. In administering injections
 - c. In complex dressing changes
 - d. In nasogastric intubation
4. Planning and adapting procedures for patients with multiple illnesses:
 - a. Positioning
 - b. Activity tolerance
 - c. Prioritizing
5. Perioperative care:
 - a. Patient and parent teaching
 - b. Preoperative preparation
 - c. Care in the immediate post-operative period
 - d. Oral airway, suction Ambu bag (adult/pediatric)
 - e. Evaluation
 - f. Documentation
6. Injections/IV (intravenous) Site Care, Blood Transfusions:
 - a. Intradermal and Mantoux test interpretation
 - b. Pediatric injections, intramuscular, subcutaneous
 - c. Adult/pediatric IV site care and blood transfusions
 - d. Documentation
7. Enteral tubes:
 - a. Nasogastric tube insertion
 - b. Tube maintenance
 1. Decompression tubes.
 2. Feeding tubes.
 - c. Tube feeding:
 1. Nasogastric.
 2. Nasojejuna.
 3. Percutaneous tubes.
 - d. Using tubes for medication administration

- e. Evaluation
- f. Documentation
- 8. Wound care:
 - a. Assessment
 - b. Irrigation
 - c. Debridement
 - d. Techniques for promoting tissue re-growth
 - e. Ostomy Care
 - f. Removal of sutures and clips, placement of strips review
 - g. Evaluation
 - h. Documentation
- 9. Pediatric catheters, adult catheter irrigations:
 - a. Purposes and techniques
 - b. Wound drains
 - c. Urinary drainage systems
 - d. Evaluation
 - e. Documentation

Assignment:

1. Reading assignments: approximately 20-50 pages per week from skills textbook in preparation of practice.
2. View required multi-media demos.
3. Attend scheduled demonstrations.
4. Discuss textbook-instructor and instructor-instructor variations.
5. Practice skills as a member of a learning team.
6. Online pre-quizzes and case scenarios.
7. Demonstrate competency with a maximum of three attempts on the skills lab rubric criteria.
8. Completion of 6-8 skill competencies.
9. Continue development of the skills portfolio.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Portfolio for skills and documentation of skills per case scenario.

Writing 0 - 5%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Successful completion of skill competency.	Skill Demonstrations 75 - 90%
Exams: All forms of formal testing, other than skill performance exams.	Exams 10 - 20%
Online pre-quizzes and case scenarios.	
Other: Includes any assessment tools that do not logically fit into the above categories.	Other Category 0 - 0%
None
