COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze and evaluate store location, layout, and store operations including: organization, buying, pricing, sales promotion, inventory planning and control, and merchandising policies.
2. Develop a plan for positive customer perception using customer service strategies, retail floor plan layout, and communication with customers and vendors, to achieve profit objectives.

Objectives:

Upon completion of this course, the student will be able to:

1. Evaluate the environment of retailing, management functions, effective strategies and organizational structures used by retail management.
2. Judge distribution and information systems with the intention to build sustainable competitive advantage based on a strategic profit model.
3. Develop skill, through the use of cases and projects, in the solving of varied functional problems in retailing.
4. Critique a retail image used to establish and maintain communication with customers and assess customer relationship management.
5. Compare and contrast nontraditional forms of retailing and summarize the principle capabilities required to manage a profitable retail multichannel business.
6. Survey buying systems, international sourcing decisions, and guidelines for maintaining strategic vendor relationships.
7. Examine effective retail floor plan layout and design of physical space.
8. Develop customer service strategies to positively influence customer perception of service quality.

Topics and Scope:

Topics will include, but not be limited to:

- A. Introduction to retailing

1. Historical overview
2. Building and sustaining relationships in retailing
3. Strategic planning in retailing
4. Careers in retailing
